AJAY DATIR

Senior QA Automation Engineer | SDET | 5.5+ Years Experience

Pune, India | +91-7276796062 | ajaydatir77@gmail.com | linkedin.com/in/ajay-datir | github.com/ajaydatir

Immediate Available | Open to Pune /Mumbai / Remote / Pan India

PROFESSIONAL SUMMARY

QA Automation Engineer with 5.5+ years of experience designing and scaling test automation frameworks (Selenium WebDriver, Cypress, TestNG, Cucumber BDD) across web, API, database, and mobile platforms. Proven track record of reducing regression cycle time by ~40% through framework re-architecture, scaling automation coverage from 30% to 70%, and driving end-to-end test strategy across BFSI and SaaS wealth-tech platforms. Strong hands-on experience with Java, JavaScript, SQL, CI/CD (Jenkins, GitHub Actions), API testing (Postman/REST, RestAssured), and mobile automation (Appium). Seeking a QA/SDET role to drive test strategy, framework ownership, and quality engineering culture.

TECHNICAL SKILLS

- Automation & Frameworks: Selenium 4.x, Cypress, TestNG 7.x, Maven, Page Object Model (POM), Cucumber BDD
- AI-Assisted Testing: GitHub Copilot, ChatGPT, Claude, Codex, Cursor AI
- Languages: Java 11/17 (OOP), JavaScript
- API Testing: Postman, RestAssured, REST API, OAuth
- Performance Testing: JMeter — Load & Stress Testing
- Database: MySQL, MongoDB
- CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub
- Test Management: JIRA, ALM, TestNG Reports
- Testing Types: Functional, Regression, Smoke, Sanity, SIT, UAT, Black Box
- Methodologies: Agile, Scrum — Sprint planning, backlog grooming, retrospectives
- Domain: BFSI, Healthcare, Core Banking, SaaS Wealth Management, ERP/CRM

PROFESSIONAL EXPERIENCE

QA Automation Engineer | *REDVision Global Technologies Pvt. Ltd.*

Jul 2024 – Present | Pune

- Architected end-to-end Selenium WebDriver + Java + TestNG + Maven automation framework from scratch using Page Object Model design pattern; became primary owner of framework architecture.
- Scaled automation coverage from ~30% to 70% by automating 150+ regression test cases, eliminating ~40% of manual regression effort per sprint cycle.
- Implemented parallel test execution via TestNG, reducing overall test suite run time significantly across Chrome, Firefox, and Edge (98% script stability via Selenium Grid).
- Built and maintained CI/CD pipeline integration using GitHub Actions for continuous, scheduled test execution triggered on every build.
- Conducted API testing on 30+ REST endpoints using Postman (REST/OAuth) and validated backend data integrity via SQL queries against MySQL databases.
- Identified and tracked 40+ critical defects across 10+ sprint cycles during early sprint testing, reducing post-release defect leakage.
- Actively contributed to Agile ceremonies: sprint planning, backlog grooming, and retrospectives in a weekly release cadence environment.

QA Engineer | *TCS — IDC Technology Solution Pvt. Ltd.*

Sep 2022 – Nov 2023 | Pune

- Tested BFSI and Core Banking applications (CATT, BOTW, BMO) for international clients across UK, US, and Canada in an Agile/Scrum environment.
- Designed and executed 200+ test cases across Functional, Regression, Smoke, SIT, and UAT testing cycles based on BRDs and functional specifications.

- Identified and resolved 80+ defects in collaboration with dev and business teams, reducing post-release issues by ~30% over 2 consecutive release cycles.
- Contributed to Selenium-based automation for key BFSI modules, reducing regression run time by ~25% across critical banking workflows.
- Performed API validation for banking services using Postman and verified backend data accuracy using complex SQL queries.
- Supported production validation and release verification; achieved zero critical defects in 4 consecutive go-lives.
- Collaborated directly with international client business analysts for requirement analysis, defect triage, and UAT sign-off.

Software Development Engineer in Test (SDET) | *Maasaheb Infotech Pvt. Ltd.*
Nov 2019 – Aug 2022 | Pune

- Designed and executed manual and automated test cases for ERP and CRM applications across 3 product modules.
- Automated 80+ regression test cases, reducing manual testing effort by ~35% and enabling consistent bi-weekly release cycles.
- Raised and tracked 60+ defects via JIRA across the full project lifecycle; participated in end-to-end STLC: requirement analysis, test design, execution, defect validation, and sign-off.
- Ensured quality standards across UI and backend application layers for all major product releases.

PROJECT EXPERIENCE

Wealth Elite — SaaS Asset Management Platform (Web + Mobile)
Tech Stack: Selenium WebDriver, Cypress, Java, TestNG, Appium, JMeter, Postman, RestAssured, SQL, GitHub Actions

- Automated 150+ regression scenarios across portfolio management, trade execution, and reporting modules using Selenium POM framework.
- Built a cross-device mobile test suite on 5+ Android/iOS configurations using Appium for consistent UI validation.
- Performed load testing with JMeter, validating stability under 500 concurrent users with <2s response time.
- Validated 30+ REST APIs using Postman/RestAssured and verified backend accuracy against MySQL schemas.

CATT, BOTW, BMO — Core Banking & BFSI Platforms
Tech Stack: Selenium WebDriver, Java, TestNG, SQL, Postman, JIRA, ALM

- Tested UI and database layers of core banking applications for international clients (UK, US, Canada).
- Executed 200+ test cases across Smoke, Regression, SIT, and UAT cycles, maintaining zero critical defects across 4 production releases.
- Automated key application modules, cutting regression execution time by ~25%.
- Performed SQL-based backend verification and REST API validation for banking integrations.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Selenium WebDriver with Java — Automation Testing.
- Postman API Fundamentals Student Expert.
- Prompt Engineering for Generative AI.
- Agile Foundation.

EDUCATION

Bachelor of Engineering (B.E.), 2018
Savitribai Phule Pune University
