# Arpita Muchewad

*MERN Stack Developer | Node.js, React.js | AI Integration*

+91 9112360954
https://github.com/muchewadarpita
muchewadarpita123@gmail.com
https://www.linkedin.com/in/arpita

## Education

**Shri Guru Gobind Singhji Institute of Engineering and Technology Nanded** 2020 - 2023

*Computer Science and Engineering Grade :* ***8.89*** *cgpa* *Nanded, India*

**Government residential women's polytechnic Latur** 2017 - 2020

*Computer Engineering Grade :* ***92.29*** *percentage* *Latur, India*

## Skills

**Proficient** Node, Express, REST API, GraphQL, JavaScript, TypeScript, React, Python, SQL & NoSQL Databases

**Experienced** MERN-Stack Development, Agentic AI, Unit Testing,CI/CD Azure Deployment

**Additional Tools** Postman, MongoDB, MySQL, Confluence, Jira, Linux, Git, GitHub, Docker, ChatGPT, Cursor, Claude AI

## Work Experience

**Global Digital Online** Feb 2025 – Present

*Software Development Engineer* *Pune, India*

- Developed and deployed AI-powered full-stack MERN applications, integrating LLM APIs (ChatGPT, Claude AI) to automate insights generation, content workflows, and user engagement.
- Built robust backend architectures using Node.js, Express, and GraphQL, ensuring scalability, modularity, and efficient data flow across services.
- Designed interactive dashboards and intelligent frontends with React.js, Material UI, Shadcn, and Ant Design, enabling real-time data visualization and decision-making.
- Engineered data pipelines and automation workflows by integrating third-party APIs and Fivetran connectors to ingest and process data from platforms like Google Ads, Facebook Ads, Shopify, and Amazon Ads.
- Implemented AI-driven analytics, leveraging LLM-based summarization, classification, and recommendation systems to surface actionable business insights.

**CogniCraft pvt.ltd** Dec-2023 – Feb 2025

*Software Development Engineer* *Pune, India*

- Designed and implemented features for large-scale analytics solutions on the goInfinitix platform, focusing on Gen-AI and Big Data technologies.
- Developed and maintained robust APIs using Node.js and Python to support various functionalities, including CRUD operations and complex data transformations.
- Designed and implemented scalable data pipelines to automate the processing and transformation of large datasets, enhancing data analytics capabilities.
- Created and templated diverse data flows, streamlining the integration and analysis of data within the goInfinitix platform.
- Managed the deployment processes of Python and Node.js applications using PuTTY.
- Performed unit testing using SonarQube and SonarScanner, ensuring code quality and reliability.
- Worked on AWS, Azure Blob Storage, and Elasticsearch in goInfinitix to support Big Data analytics.
- Wrote clean code for the goInfinitix platform, adhering to best practices and industry standards.

**Iauro Systems pvt.ltd** Jan-2023 – Sep-2023

*Software Developer Intern* *Pune, India*

- Developed RESTful Web APIs using Node.js and Express/Nest.js frameworks. Implemented robust authentication, validation, and security measures to ensure data integrity and user privacy.
- Designed and implemented efficient database schemas and models for optimal performance and data storage. Implemented unit tests using frameworks such as Jest to ensure the reliability and stability of the APIs
- Collaborated with front-end developers to design and develop APIs for a survey builder application.
- Implemented CRUD functionality for creating, updating, retrieving, and deleting surveys and related data.

## Projects

**Chatwithads** Feb 2025 – Present

- Chatwithads is an AI-powered marketing analytics platform that centralizes data from multiple advertising channels including Google Ads, Facebook Ads, Shopify, and Amazon Ads.
- It features automated data pipelines for real-time ingestion, cleaning, and synchronization of marketing campaign data using Fivetran.
- The platform provides interactive dashboards built with React.js and Material UI, enabling users to visualize trends, compare campaign performance, and monitor key metrics efficiently.
- A custom GraphQL API ensures optimized data retrieval and seamless integration between frontend and backend.
- AI models powered by Claude AI and OpenAI analyze historical and real-time data to generate predictive insights and actionable recommendations for optimizing ad campaigns and improving ROI.
- Overall, Chatwithads enables marketers to make data-driven decisions, automate performance tracking, and enhance multi-channel campaign effectiveness.

**goInfinitix** Dec 2023 – Feb 2025

- Built a Gen-AI and Big Data analytics platform using Node.js and Python.
- Designed scalable APIs and automated data pipelines for real-time insights.
- Designed and implemented robust data pipelines to automate ingestion, cleansing, and aggregation of large-scale datasets from various sources.
- Worked on cloud services including AWS and Azure Blob Storage to support platform scalability and performance.
- Used Elasticsearch for efficient indexing and querying of high-volume datasets.
- Performed unit testing using SonarQube and SonarScanner to ensure reliability and maintainability of codebase.
- Contributed to templating of reusable data flows and implemented checks/metrics for each pipeline type.
