Chanchal Patil

Software Test Automation Engineer | C#/.NET | Selenium | Playwright | AI-Assisted Testing

Pune, India | 9049777321 | chanchalpatil1407@gmail.com | linkedin.com/in/chanchal-patil-1a20b6215

PROFESSIONAL SUMMARY

Software Test Automation Engineer with 3+ years at Wolters Kluwer, specializing in UI automation, API testing, regression testing, and release validation using C#/.NET, Selenium WebDriver, Playwright, WinAppDriver, Python, and Azure DevOps CI/CD. Architected QAi Studio, an AI-native QA automation platform orchestrating 15+ LLM agents over the Model Context Protocol (MCP). Hands-on experience testing LLM and RAG systems for response accuracy, hallucinations, and citation verification. Familiar with agentic AI, LLM orchestration, Azure OpenAI, FastAPI, .NET 9, Azure Key Vault, and spec-driven development. Promoted in 2025 for automation ownership and problem-solving. **Immediate joiner.**

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, Selenium Grid, Playwright, WinAppDriver, Page Object Model (POM), Hybrid Framework, UI Automation, Desktop Automation, Regression Automation
Programming and Frameworks: C#, .NET, Python, xUnit, NUnit, MSTest
API Testing: Postman, Swagger, REST API Testing, REST/SOAP, Payload and Status Code Validation
CI/CD and Version Control: Azure DevOps, GitHub Actions, CI/CD Pipelines, YAML, Git
Test Management and Documentation: Azure Test Plans, Confluence, Defect Tracking, Test Case Documentation
LLM and RAG Testing: Prompt Validation, Response Accuracy and Consistency, Hallucination Detection, Citation Verification
AI-Assisted Testing: Model Context Protocol (MCP), Custom MCP Servers, AI-Based Assertions, Centralized Logging, Prompt Engineering, Agentic AI, LLM Orchestration, Azure OpenAI
AI Engineering Tools: Claude, Cursor, ChatGPT, GitHub Copilot (scripting, debugging, SQL generation, API test creation, documentation)
Quality Practices: Test Case Design, Test Coverage, Test Execution, Smoke Testing, Regression Testing, Release Validation, Defect Lifecycle, Defect Tracking, Test Strategy, Agile, STLC

PROFESSIONAL EXPERIENCE

Software Test Automation Engineer | Wolters Kluwer | Pune, India | 10/2025 - Present

- Built and maintained Selenium WebDriver automation frameworks in C#/.NET covering 150+ UI and API test cases, improving regression coverage by ~35%.
- Reduced regression execution time by ~40% through Azure DevOps CI/CD integration and test suite optimization.
- Supported AI-assisted testing workflows using custom MCP servers, AI-based assertions, and centralized logging, cutting test authoring and debugging effort by ~30%.
- Performed automation scripting, debugging, API test creation, and documentation using Claude, Cursor, ChatGPT, and GitHub Copilot.
- Investigated automation and environment issues, improving suite stability by ~25% and supporting 10+ release sign-offs.
- Promoted in 10/2025 for automation ownership and problem-solving.

Associate Software Test Automation Engineer | Wolters Kluwer | Pune, India | 07/2023 - 10/2025

- Automated 100+ regression workflows with Selenium WebDriver and C#/.NET, reducing manual regression effort by ~45% per release.
- Validated API response codes, payloads, and business rules across 50+ endpoints with Postman, improving early defect detection by ~30%.
- Supported release sign-offs and resolved automation and environment issues, reducing environment-related test failures by ~25%.

PROJECTS

QAi Studio (Cortex) | AI Platform and Test Automation Architect

- Architected an AI-native QA automation platform (Python/FastAPI, .NET 9, ~120K lines of code) orchestrating 15+ LLM agents over MCP to generate, execute, migrate, and review tests.
- Covered Web, Desktop, REST/SOAP, and CI pipelines, generating 100+ automated tests and reducing test authoring time by ~50%.
- Applied Azure OpenAI, Azure Key Vault, and spec-driven development; validated LLM output for accuracy, hallucinations, and citation correctness.

Client Collaboration | Desktop Automation Project

- Automated 20+ critical desktop workflows for a client collaboration application using .NET-based automation, validating user interactions and data flows.
- Designed and executed smoke and regression test suites, reducing release validation time by ~40% and ensuring stability across releases.

ADOMON | Azure DevOps Monitoring Tool

- Tested and validated an Azure DevOps monitoring tool, verifying build and release pipeline health, execution logs, and failure notifications.
- Improved CI/CD visibility and reliability by ~30% through structured validation and defect analysis.

EDUCATION

Bachelor of Computer Engineering | Pravara Rural Engineering College, Loni (SPPU) | 08/2019 - 05/2023 | CGPA: 9.05

CERTIFICATIONS

Programming Fundamentals; Building .NET Console Applications in C#; Defensive Coding in C#; C# Advanced Language Features; YAML Fundamentals; API Testing Foundations

ACHIEVEMENTS

- Code Games, 2nd Place Winner (06/2026), internal coding competition.
- Code Games, 3rd Place Winner (06/2024), internal coding competition.
- Python Bootcamp, Runner-Up (2021).
