DILEEP YADAV

QA Automation Engineer | Java | Selenium WebDriver | Playwright | API Testing | AI-Assisted QA

+919198473884 | Pune, Maharashtra

yadavdileep557@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

QA Automation Engineer with **2+ years of hands-on experience** in **Manual, Automation, API, and AI-Assisted Testing**, with expertise in **Java, Selenium WebDriver, Playwright, TestNG, Cucumber, Rest Assured, and Postman**. Experienced in **POM, BDD, and Hybrid frameworks**, reusable automation, and **functional, regression, smoke, sanity, UI, API, and E2E testing**. Proficient in **Jira, Git, Maven, Jenkins, CI/CD**, and **AI Agents & GitHub Copilot** for test-case generation, analysis, automation development, and QA productivity.

EXPERIENCE

MPHASIS PVT. LTD. | Associate Software Engineer | Aug 2024 – Present , Pune Maharashtra
Client: US-Based Financial Services Client | **Project:** ComplianceOne (C1) | **Domain:** Banking & Financial Services (BFS)
Tech Stack: Java, Selenium WebDriver, SQL, TestNG, Cucumber, Postman, Maven, Jenkins, Git, AI Agents, GitHub Copilot
Project : ComplianceOne (C1) is an **Appian-based enterprise application in the Banking & Financial Services domain**, Supporting **investment and trading-related compliance workflows**, including employee registration, licensing, disclosures, attestations, supervisory reviews, regulatory requirements and compliance-related business processes. The application enables **end-to-end compliance management, workflow automation, business-rule validation.**

- Develop and maintain **Java-based Selenium WebDriver automation** for critical web workflows and regression suites, building **reusable test scripts, robust web-element locators, XPath/CSS selectors, explicit waits, synchronization mechanisms, and test utilities**, improving **regression execution efficiency by ~30%**.
- Develop and execute automated test cases using **TestNG**, implementing **assertions, annotations, explicit waits, synchronization, reusable utilities, and test-data handling** to improve automation **reliability, maintainability, and execution stability**.
- Enhance **POM, BDD, and Hybrid automation frameworks** using **Java, Selenium WebDriver, TestNG, and Cucumber**, developing reusable **Page Objects, step definitions, feature files, hooks, utilities, common components, and framework-level reusable methods** to reduce duplication and simplify maintenance.
- Design and execute **functional, regression, smoke, sanity, UI, integration, and end-to-end testing**, translating **business requirements and acceptance criteria** into comprehensive test scenarios, test cases, and automated validations of critical business workflows.
- Perform **REST API testing using Postman** and **SQL-based database validation**, verifying **HTTP methods, status codes, JSON request/response payloads, API assertions, backend data, business rules, data consistency, and end-to-end integration workflows**.
- Build and leverage **AI Agents and AI-assisted QA workflows** for **requirement analysis, test-case generation, test-scenario creation, test-data preparation, and repetitive QA activities**, reducing manual test-design effort by **~30%**; use **GitHub Copilot** for automation code generation, refactoring, debugging, and test-script optimization.
- Integrate automation suites with **Maven and Jenkins** to support **CI/CD and continuous testing**, manage source code using **Git/GitHub**, track and validate defects through **Jira**, and collaborate within **Agile/Scrum** processes for continuous regression and release validation.

EDUCATION

United College of Engineering and Management, Prayagraj, Uttar Pradesh
Bachelor of Technology (B.Tech.) in Computer Science Engineering | Aug 2018 – Jul 2022

SKILLS

Programming & Test Automation: Java ,Python, TypeScript, SQL, Selenium WebDriver, Playwright, TestNG, JUnit, Cucumber
Automation Frameworks & Practices: Page Object Model (POM), BDD (Cucumber), Hybrid Framework, Data-Driven Testing
API Testing & Tools: REST API Testing, Postman, JSON, HTTP Methods, API Request/Response Validation, Status Code Validation
Testing Expertise: Web UI Automation, Manual Testing, API Testing, Functional, Regression, Smoke, Sanity, Integration Testing
QA Practices & Methodologies: SDLC, STLC, Agile/Scrum, Failure Analysis, Root Cause Analysis, Defect Lifecycle Management
CI/CD & Version Control: Maven, Jenkins, Git, GitHub, CI/CD, Continuous Testing, Build Automation, Automated Test Execution
AI-Assisted QA: AI Agents, GitHub Copilot, Test Analysis ,Test Case Generation, Automation Code Development , Optimization
