Designation- Software Test Engineer **(Immediate Joiner)** +91 **9960484794**

Career Objective:

Automation and Manual Test Engineer with **4 years of experience** in **Selenium WebDriver, Java, TestNG,** and **API Testing** delivering high-quality and reliable software solutions. Proven expertise in **E-commerce and Banking/Payment domains**, wit strong skills in **functional, regression,** and **automation testing** across the SDLC.

Profile Summary:

- Automation and Manual Test Engineer with **4 years** of experience at Web Crypt Technology & Tata Consultancy Service.
- Designed and executed automation test scripts using **Selenium WebDriver** for Page Object Model architecture.
- Worked with **Cucumber BDD and Gherkin**, creating Feature Files, Step Definitions, Hooks, and Scenario Outlines.
- Developed automation test cases using **WebDriver** methods, Java programming concepts, and **TestNG** annotations.
- Implemented Data-Driven Testing, **Cross-Browser Testing**, Parallel Test Execution using **Selenium** and **TestNG.**
- Executed, debugged, and **analyzed automation test runs**, identifying failures and ensuring **test stability.**
- Analyzed requirement specifications and design documents to ensure accurate **test coverage.**
- Actively involved in **Functional**, **Non-Functional, Regression**, and **Sanity Testing activities**.
- Converted manual test cases into **automated regression** and sanity test suites.
- Validated **RESTful APIs** using **GET, POST, PUT, and DELETE** methods.
- Prepared & maintained test documentation including **test scenarios, test plans**, test data, test cases, defect reports.
- Participated in defect management process, including **defect logging, tracking**, and **retesting.**
- Presented **UAT** and release demo sessions to stakeholders during different project phases.
- Experience working in **Agile Scrum methodology,** actively participating in sprint ceremonies.

Professional Experience:

- Worked as a Software Test Engineer at Web Crypt Technology Pvt Ltd from Aug 2025 to Present.
- Worked as a System Engineer at Tata Consultancy Services from July 2022 to July 2025.

Technical Skills:

Operating System	Windows 10
Automation Testing	Selenium WebDriver, Playwright, TestNG, WebDriver, Cucumber (BDD), Rest Assured.
Manual Testing	Functional Testing, Non-Functional Testing, Smoke Testing, Regression Testing, UI Testing
Applications & Tools	Eclipse, Jenkins, Maven, Jira
Database	My SQL
Scripting Languages	Core Java, , JavaScript

Education Qualification:

- Completed Bachelors in Information Technology from Amaravati University, with 82.44% in 2022.
- Completed HSC from Maharashtra State board, with 80.31% in 2018.
- Completed SSC from Maharashtra State board, with 90.6% in 2016.

Project Experience:

1. **Current Organization:** Web Crypt Technology Pvt Ltd.
Project: E-Commerce Web Application
Role: Automation Test Engineer
Duration: Aug 2025 to Till Date

Description: The project involved testing an E-Commerce web application designed for online product browsing, ordering, payment processing, and order management. The application supports multiple user roles and integrates with backend REST APIs. The focus was on ensuring functional accuracy, performance stability, and seamless user experience through both manual and automation testing.

Roles & Responsibilities:

- Requirement Analysis: Analyzing User Story communicating with PO for better understanding of the requirements.
- Experience in Agile methodology and Actively Participated in scrum meeting.
- Identified Scenarios, Test Cases based on User Story. Designing and executing test cases according to the Functional specifications and Validation of Expected output Vs Actual output.
- Logging and tracking defects in JIRA, consulting with development team for closure of defect.
- Worked with Cucumber BDD and Gherkin, creating Feature Files, Step Definitions, Hooks, and Scenario Outlines.
- Performing Smoke testing, Functional & Non-Functional Testing, Retesting & Regression Testing.
- Use GET, POST, PUT methods in API Testing Using POSTMAN and validate the data.
- Automation tester involved in the creation of automation test scripts using the Playwright tool.
- Run test suite and log defects accordingly Performing Functional Testing and Regression Testing, Cross Browser Testing, UI Testing and Automation Testing using Playwright with JavaScript.
- Used Playwright locators, assertions, and waits to automate dynamic web application testing and automated end-to-end test scenarios using Playwright.
- Perform Manual Testing on a new build in the Regression phase

2. **Previous Organization:** Tata Consultancy Services
Project: CITI Bank
Domain: Payment (Transactions)
Role: Automation Test Engineer
Duration: July 2022 to July 2025

Description: Worked as an Automation and Functional Tester for payment transaction testing across multiple financial systems, including RTGS (Real-Time Gross Settlement), KNPS (Kuwait National Payment System), SEPA (Single Euro Payments Area), and the Bahrain Payment Hub application. Actively participated in quality assurance processes, test planning, and automation feasibility assessments, contributing to effort estimation and overall project delivery. Analyzed business and technical requirements to design comprehensive test cases, achieving high test coverage, and developed scalable automation

Roles & Responsibilities:

- Worked as an Automation and Functional Tester on payment transaction systems including RTGS, KNPS, SEPA, and Bahrain Payment Hub.
- Analyzed business and technical requirements to understand end-to-end payment workflows.
- Worked with Cucumber BDD to implement behavior-driven testing using Feature files, Gherkin syntax, Step Definations, Hooks, and Scenario Outlines.
- Designed and executed functional and system test cases to validate transaction accuracy and data integrity.
- Performed Functional Testing, Retesting, and Regression Testing across multiple releases.
- Developed and maintained automation test scripts using Selenium WebDriver with Java.
- Implemented Page Object Model (POM) for a scalable and maintainable automation framework.
- Executed automated test suites and analyzed results to identify defects and regressions.
- Participated in test planning, effort estimation, and automation feasibility analysis.
