HEMANGINI MARATHE

QA Automation Engineer | Selenium | Playwright | Cypress | JavaScript

Pune, Maharashtra, India | +91 9054583679 | hemanginimarathe@gmail.com

Languages: English, Hindi, Marathi, Gujarati

PROFESSIONAL SUMMARY

QA Automation Engineer with 3+ years of experience testing Web, Mobile, API, and Security applications across fintech, blockchain, and enterprise platforms. Builds scalable automation frameworks using Selenium WebDriver and Java (Page Object Model, Hybrid, Data-Driven), with hands-on experience in Playwright and JavaScript. Skilled in API testing (Postman, Rest Assured), performance testing (JMeter), database validation (MySQL), and defect lifecycle management (Jira, XRAY). Experienced in Agile/Scrum delivery, BDD (Cucumber), and CI/CD pipelines (GitLab CI/CD, Jenkins, Docker). Reduced regression testing effort by 30% through automation suite optimization, strengthening release quality and speed.

CORE SKILLS

Automation Tools: Selenium WebDriver, Playwright, Cypress

Programming Languages: Java, JavaScript, SQL

API & Performance Testing: Postman, Rest Assured, Apache JMeter

Database: MySQL, SQL

CI/CD & DevOps: Jenkins, GitLab CI/CD, Docker, YAML, Git

Test & Defect Management: Jira, XRAY, GitLab

Methodologies: Agile, Scrum, BDD (Cucumber), Test Automation Framework Design

Testing Types: Functional, Regression, Smoke, Sanity, Integration, Cross-Browser, API, Mobile, Security

PROFESSIONAL EXPERIENCE

Software Tester — SecureLayer7Oct 2024 – Present

- Architected and maintained a Selenium WebDriver + Java automation framework using the Page Object Model (POM), improving script reusability and maintainability across releases.
- Drove functional, regression, and cross-browser testing across web applications each sprint, strengthening release confidence for the QA team.
- Validated backend integrations and API contracts through structured API testing using Postman.
- Owned defect lifecycle management — logging, tracking, and triaging issues in Jira and GitLab within an Agile/Scrum delivery model.
- Reduced regression testing effort by 30% by streamlining and prioritizing the automated test suite, accelerating release cycles.

QA Executive — Bitrix Infotech Pvt. Ltd.Jun 2022 – Mar 2024

- Authored manual and automation test cases and developed Selenium scripts using Java, delivering consistent functional and regression coverage.
- Conducted API testing using Postman and load/performance testing using JMeter to validate application reliability under load.
- Ensured data integrity across application workflows through MySQL and SQL query-based validation.
- Tested blockchain-based applications end-to-end, partnering closely with developers to identify, document, and resolve defects pre-release.

KEY PROJECTS

HireMe, Split Easy, Sports Beat, WeGuess, Celarush, Montaction, AquaSolitair, Churps, 235 Bit, Theme Bitrix, App Bitrix, and Coinremetter (Blockchain) — functional, regression, and API testing across web, mobile, and blockchain platforms.

EDUCATION

MCA — Jain Deemed-to-be University, 2024

BCA — Udhna Academy College of BCA & IT, 2020
