Summary

I am a results-driven and passionate software engineer with a robust foundation in modern technologies and a proven record of delivering exceptional solutions. I eagerly embrace new challenges, collaborate with diverse teams, and drive innovation through technical mastery and continuous learning.

Experience

Software Engineer *Jaipur, RJ*
InTimeTec *Jan 2024 – Present*

- Led a module with a team of 3 co-developers, providing bi-weekly demos to the client and ensuring 100% requirement fulfillment.
- Designed and implemented a new credit report structure using ActiveReports 18, achieving a document generation success rate of **100%**.
- Optimized report generation, reducing execution time by **33%** (**6s** to **4s** per report) and boosting system efficiency.
- Recognized as 'Best in Agile' for consistent deliverables and active participation in retrospectives.
- **Technologies:** React.js, TypeScript, Tailwind CSS, .NET 8, .NET Framework 4 (WCF), ASP.NET Web API, SQL Server, ActiveReports 18, Azure DevOps, Git/TFVC

Software Engineer Intern *Remote*
Psymate HealthCare *Oct 2023 – Dec 2023*

- Collaborated with a team of 4 in a startup environment, developing and deploying 6+ front-end pages.
- Managed tasks using Jira, completing 100% of assigned tickets within deadlines.
- **Technologies:** React.js, Node.js, Express, MongoDB, Firebase, JavaScript, HTML5, CSS3, GitHub, Jira

Education

Arya College of Engineering & I.T., Affiliated to RTU, Kota *Sept 2020 – May 2024*
B.Tech in Computer Science — **GPA:** 9.3/10.0

Academic Projects

H&M Dashboard *Dashboard*

- Engineered a full-stack E-Commerce Sales Dashboard to deliver real-time analytics for sales, inventory, and revenue, supporting **5+ business roles** and enabling data-driven decision-making with **live insights**.
- Integrated Freshdesk, Mosquitto, and Hangfire APIs to automate background operations and streamline customer support, achieving a **40% reduction** in manual intervention.

InterviewPrep *InterviewPrepV14*

- Launched a **JavaScript-focused** coding platform, attracting **10+ active users**, fostering peer interaction, and driving revenue through **3 subscription plans**.
- Led a 6-month development cycle, resulting in a platform that can be used by job seekers.

Technologies

Programming Languages: C, C++, C#, JavaScript, Python, TypeScript

Libraries/Frameworks: .NET 8, ASP.NET, .NET Web API, Express, Next.js, React, Redux, Bootstrap

Tools/Platforms: SQL Server, ActiveReports 7 & 18, SOAP, REST, Git, TFVC, Azure DevOps, BeautifulSoup, Figma, Firebase, GitHub, Google OAuth, MongoDB, Netlify, Tailwind CSS, Vercel

Certification: Red Hat Certified System Administrator (Issued May 2023 · Expires May 2026)
