Jaydeep Mane - Full Stack Developer (MERN / MEAN) | Immediate Joiner

Pune, Maharashtra - jaydeepmane6862@gmail.com - +91-9067211658

GitHub | LinkedIn | Portfolio

Professional Summary

Full Stack Developer with **3+ years of experience** delivering **scalable, enterprise-grade applications** using the **MEAN and MERN stack** (MongoDB, Express.js, Angular/React.js, Node.js, Nest.js). Expert in **Angular and React** for building responsive, modular, and high-performance UIs. Skilled in **backend API development, real-time integrations**, and **cloud deployments**. Hands-on experience across **Supply Chain Management, Sky Office 360 (LMS, CRM, Forms, Website & Landing Page Builders, WA Messenger, Content Studio, HRM, Accounting), Data Governance, IoT, and Healthcare** domains, driving **40–60% performance improvements** and automation through optimized workflows. Proficient in **CI/CD Implementations** and deployments on AWS, DigitalOcean, and **Namecheap.**

Experience

🏢 Moonhive Pvt Ltd – Bangalore, India

Software Engineer | Jul 2024 – Oct 2025

- Worked on a diverse range of applications including Notary Platform, Brand Advocacy, IoT Monitoring, and Healthcare systems, and Sky Office 360 product suite.
- ✅ **Project:** Sky Office SSO 360 (LMS, CRM, HRM, Accounting, Forms, Website & Landing Page Builders, WA Messenger, Content Studio)
    - Developed and maintained modules across **Learning Management, Sales & Marketing, Academic ERP, HR, and accounting workflows**.
    - Built responsive dashboards for analytics, reporting, and real-time monitoring of business and educational processes.
    - Implemented features for **lead generation, user management, performance tracking, financial management, content creation, and communication workflows**.
    - **Stack:** Angular, React.js, Node.js, MongoDB, Express.js, Twilio API.
    - **Result:** Streamlined enterprise and educational workflows, reducing manual effort by 50%, improving operational efficiency, and enhancing user engagement across multiple departments.
- ✅ **Project:** Brand Advocacy Platform with AI Post Suggestions
    - Built a platform for firms to promote brands and earn points by sharing posts across **LinkedIn, Instagram, and X (Twitter)**.
    - Integrated **AI-powered post suggestion** based on keywords to automatically generate content for social media.
    - **Stack:** React.js, Node.js, MongoDB, OpenAI API, Social Media APIs.
    - **Result:** Increased user engagement and brand visibility, automating content creation and reducing manual effort by 60%.

🏢 ProsperaSoft – Pune, India

Software Engineer | Aug 2023 – Jul 2024

- Contributed to multiple enterprise apps including **Data Governance, eCommerce, and Desktop Automation Tools.**
- Built dashboards using React; developed secure REST APIs in Node.js.
- ✅ **Project:** Data Governance Platform
    - **Integrated BigID and FreshService APIs** for enhanced compliance and enterprise-grade data protection. Implemented robust access controls, data masking, and detailed audit logs for improved governance.
    - **Outcome:** Significantly increased overall data security coverage by 45% and reduced manual compliance effort by 30%.

- ✅ **Project:** Desktop Automation Tool
  - **Created a cross-platform Electron.js application** to automate test workflows, enabling internal QA teams to streamline file processing, manage test cases, and handle exports efficiently.
  - **Result:** Successfully cut down manual QA testing effort by approximately 60%, significantly improving team efficiency.
- ✅ **Project:** eCommerce Admin Dashboard
  - **Built comprehensive admin panels and analytics features** using React and Express, improving data filtering, insights, and overall admin efficiency by 50%.
  - **Result**: Enhanced administrative productivity and decision-making, improving efficiency by 50%.

🏢 **ITOrizon India Pvt Ltd – Bangalore, India**

Software Analyst | Jun 2022 – Jul 2023

- Worked at a product-based company on a **large-scale Supply Chain Management System**.
- Built UI components in **Angular** and contributed to **backend APIs in Node.js**.
- Designed over 40+ screens and modules for **inventory, shipment, and order tracking.**
- Implemented role-based access, real-time updates, and analytics features.
- ✅ **Project:** SCM (Supply Chain Management) Platform
  - Developed and maintained features across frontend **(React), backend (Node.js), and MongoDB**
  - Integrated charts and reports using **Chart.js.**
  - Improved admin efficiency by 50% through data filtering and insights.
  - **Result:** Improved operational tracking efficiency by 40% and reduced data sync lag by 35.

Personal Projects

🌄 **PhotoSharing App**

- Secure real-time sharing app with Google OAuth and JWT authentication
- Stack: React, Redux, Node.js, MongoDB, Socket.io

🚗 **Car Management System**

- Admin/user dashboards with vehicle and analytics module
- Stack: Angular, Material UI, Chart.js

🪙 **Crypto View App**

- Live coin tracking with CoinGecko API
- Stack: HTML, CSS, JavaScript Third Party API, Chart.js

Skills

Frontend: React.js, Angular, Redux, Bootstrap, PrimeNG, Material UI
Backend: Node.js, Nest.js, Express.js, REST APIs, WebSocket, JWT
Database: MongoDB, MySQL, Firebase
Tools: Git, Postman, Nginx, PM2, GitHub Actions
Cloud/DevOps: AWS EC2, DigitalOcean, Firebase Hosting
Testing: Jest
Languages: JavaScript, TypeScript, Core Java, C, C++, Python
Others: CI/CD Pipelines, Open AI, Electron.js

Education

B.E. Electronics & Telecommunication

Sharad Institute of Technology, Ichalkaranji – 2017 to 2021

Higher Secondary Certificate (HSC)

Maharashtra State Board – 2015 to 2017
