EXPERIENCE

S3 Infotech Private Limited
Technical Consultant
April-2022–currently

D365 Finance & Operations Projects
Internal Migration from AX 2012 to D365 Finance and Operations – Plant and Maintenance Module

- Participated in the end-to-end migration of the Plant and Maintenance module from Microsoft Dynamics AX 2012 to Dynamics 365 Finance and Operations.
- Analyzed and mapped existing business processes to the D365 framework, ensuring functional parity and process optimization.
- Customized and configured the Plant and Maintenance module to meet organizational needs, including work order management, asset tracking, and preventive maintenance scheduling.
- Collaborated with cross-functional teams to gather requirements, perform gap analysis, and support data migration and validation activities.
- Conducted system testing, UAT support, and post-go-live troubleshooting to ensure a smooth transition with minimal downtime.
- Provided end-user training and documentation to support the adoption of the new system

---

- Lifecycle & Release Management
- Hands on Technical Design Document
- Performance Optimization & Troubleshooting

PwC (*Contracted as a D365 Finance & Operations Technical Consultant)*

- During this project a worked-on GST Register, TDS Register and Customs and Trade Module.
- GST registers collect all vendor and customer invoices into our custom Separate Table. From there, it allows pushing the invoices to the cloud via **API integration**, supporting single-record selection, multiple-record selection, or batch job processing. It is a one-way integration of D365fo to cloud solutions.
- TDS register collects all Vendor and Customer invoices into our custom Separate Table. From there, it allows pushing the invoices to the cloud via **API integration**, supporting single-record selection, multiple-record selection, or batch job processing. It is a one-way integration of D365fo to cloud solutions.
- Customs and Trade: Pulling all the Bill of entry and Shipping Bill Cloud solution to D365fo customs grid in a scheduled frequency with **API integration**.

Yachio Project (*End-to-End Implementation)*

- Worked on **E-Invoice Integration** and developed custom SSRS and query-based reports.
- Customized standard forms and tables to meet client-specific requirements.
- Involved in the development of SSRS reports and customized data structures (Forms, Tables, EDT, Enum)

Bata Project (*D365 F&O to SFTP Integration)*

- Developed a process to generate and upload TXT files for journal lines to an SFTP portal.
- Created GSTR1 and GSTR2 invoices, credit/debit notes, and bill of supply documents.
- Worked on ER Reports to facilitate automated reporting and document generation.

Steel Company (*D365 F&O Technical Support)*

- Provided support for the **Inventory Module** and implemented custom number sequences using X++.
- Created custom **EDTs, Enums, Tables, Forms, AOT Queries, and Classes** to enhance functionality.
- Delivered client support on Dynamics F&O system issues and technical troubleshooting.

AX 2012 Projects

Steel Company (*Implementation & Technical Support)*

- Contributed to multiple modules including **Accounts Payable, Accounts Receivables,** and **Production Information Management**.
- Performed **data migration (**Import, Export**)** for posted purchase and sales orders using X++.
- Developed X++ scripts to automate product creation and provided ongoing technical support.
