QA TEST ENGINEER

Detail-oriented and highly motivated Software Test Engineer with over 3+ years of experience in manual and automation testing across web and mobile applications. Skilled in identifying bugs, enhancing software quality, and ensuring smooth user experiences. Proven ability to work collaboratively in Agile environments and continuously improve testing processes. Seeking a challenging QA role to contribute technical expertise and a commitment to software excellence.

KEY SKILLS

Manual Testing (Web & Mobile)	Agile / Scrum Methodology	User Acceptance Testing (UAT)
Functional & Regression Testing	Test Case Design & Execution	QA Metrics & Reports
API Testing (REST APIs)	Defect Reporting & Tracking	Communication

PROFESSIONAL EXPERIENCE

Bajaj Finserv Direct Limited, Pune **2022 - Present**
Software Tester

Led end-to-end manual testing initiatives across multi-platform applications, directly contributing to a 30% reduction in post-release defects. Spearheaded the creation and optimization of comprehensive test plans and execution strategies, significantly enhancing software stability and user satisfaction. Collaborated cross-functionally with product and development teams to streamline Agile workflows, accelerating feature deployment cycles and elevating overall product quality.

Accomplishments:

- Collaborated with cross-functional teams (Dev, Product, QA) to ensure smooth integration of new features.
- Developed and executed comprehensive test plans, cases, and checklists for web, Android, and iOS platforms.
- Identified and documented critical bugs prior to production release, minimizing post-release issues.
- Conducted usability testing on multi-platform devices, ensuring consistent user experience.
- Participated in daily standups, sprint planning, and retrospectives as part of Agile process.
- Assisted developers in troubleshooting and verifying bug fixes.
- Maintained and updated testing documentation to reflect changes in software requirements.
- Promoted continuous process improvements and ensured compliance with QA best practices.

PROJECTS

Bajajmall - Ecommerce

Project Overview:
BajajMall is a cutting-edge online e-commerce platform that allows customers to purchase a wide range of products—ranging from electronics, appliances, mobiles, furniture, to fitness and lifestyle goods—on easy No Cost EMI using Bajaj Finserv EMI Network Card. The platform supports seamless digital journeys, quick approvals, and smooth customer experiences across desktop and mobile apps (Android & iOS).

Responsibilities:

- Analyzed business requirements and translated them into detailed test cases and test scenarios covering functional, UI, UAT, and regression testing.
- Conducted manual testing for both web and mobile platforms to ensure consistent user experience across devices.
- Performed cross-browser testing, API testing using tools like Postman, and integration testing for payment gateways, cart systems, and order workflows.
- Participated in daily Agile ceremonies, sprint planning, and retrospectives to align with fast-paced release cycles.
- Logged and tracked defects using JIRA, collaborated with developers to resolve critical issues before production releases.
- Validated promotional campaigns, discount logic, EMI eligibility workflows, and product listing modules.
- Actively contributed to test documentation and maintained reusable test cases for ongoing product modules.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar
Pune University, Pune
Graduated: April/May 2021
