# MUNEESWARI N

QA Test Engineer | Manual & Automation Testing | Web & Mobile Applications

Coimbatore, India | +91-9488155178 | muneeswari.nagaiah@gmail.com | linkedin.com/in/muneeswari-nagaiah-982b22393 | Immediate Joiner

## PROFESSIONAL SUMMARY

Results-driven QA Test Engineer with 3.5+ years of experience in software quality assurance for Web and Mobile applications (iOS & Android), combining strong manual testing expertise with hands-on automation test engineering using Selenium WebDriver and Java. Skilled in test case design, exploratory testing, defect lifecycle management, and building hybrid automation frameworks. Experienced in REST API testing, CI/CD pipelines, and continuous testing within Agile/Scrum environments. Proven track record in UAT and production deployments, .NET Core environment setup, and client support, committed to delivering reliable, high-quality software through collaboration with cross-functional teams.

## KEY SKILLS

**Languages:** Java

**Automation:** Selenium WebDriver, TestNG, Maven, Automation Framework Design, Playwright .

**Frameworks:** Hybrid Framework, Page Object Model (POM), Data-Driven, Keyword-Driven, Cucumber BDD

**API Testing:** Postman, REST API Validation, Rest Assured

**CI/CD & Version Control:** Jenkins, Git, GitHub, Azure DevOps

**Mobile Testing:** Android, iOS, MDM, Microsoft Intune, SSO

**Bug Tracking:** JIRA, Mantis

**Testing Types:** Functional, Exploratory, Ad-hoc, UAT, Regression, Smoke, Sanity, Integration, System, Performance, Cross-Browser, E2E

**Methodologies:** Agile, Scrum, SDLC, STLC, Test Strategy, Test Planning

**Deployment:** .NET Core, Patch Deployment, UAT & Production Setup, Environment Migration

**Tools:** SQL (Basics), Excel, MS Word, Power BI, SRS Documentation

## WORK EXPERIENCE

**Software Test Engineer** — SIERRA ODC Private Limited, Coimbatore, India *Dec 2022 – Aug 2026*

***Manual & QA Testing***

- Performed comprehensive manual testing including functional, exploratory, regression, smoke, sanity, integration, system, and UAT for Web and Mobile (iOS & Android) applications across Dev, QA, and Production environments.
- Designed and executed 500+ manual test cases and test scenarios from scratch based on SRS, business requirements, and user stories; conducted exploratory and ad-hoc testing to uncover edge cases missed by scripted tests.
- Led UAT sessions with business stakeholders and clients, capturing feedback, validating acceptance criteria, and signing off releases.
- Tracked and managed defects through the complete lifecycle using JIRA and Mantis; performed root cause analysis and collaborated with developers for timely resolution.
- Prepared detailed test plans and test strategies; created SRS documents, use cases, and user flow diagrams.
- Collaborated with cross-functional Agile/Scrum teams across SDLC/STLC phases, including stand-ups, sprint planning, and retrospectives.

***Automation Testing***

- Developed and maintained a Hybrid Automation Framework using Java, Selenium WebDriver, TestNG, and POM, improving overall test efficiency and reusability.
- Built and executed 200+ automated regression test cases, saving 10+ hours of manual regression effort per sprint.
- Performed REST API testing using Postman and Rest Assured; validated request/response payloads, status codes, and integration touch points.
- Supported CI/CD pipeline integration using Jenkins, Git, and Azure DevOps for continuous testing.

## PROJECT EXPERIENCE

**Test Engineer | eFACiLiTY – Reliance Group (RIL)** *Feb 2026 – Aug 2026*

- Supported end-to-end manual QA and UAT testing for the Maintenance Management System, ensuring requirements were validated and successfully delivered.
- Designed and executed functional and regression test cases, identified and logged defects, and coordinated with development teams for resolution.
- Coordinated with stakeholders, business analysts, and developers to validate requirements, acceptance criteria, and UAT scenarios.
- Supported UAT sign-off and production deployment activities, including post-deployment validation and issue resolution.
- Provided end-to-end client support, from initial implementation through Change Request (CR) activities, ensuring smooth delivery and timely resolution of client-raised issues.

**Test Engineer | eFACiLiTY – JCI (Jansons Group of Companies)** *Apr 2025 – Jan 2026*

- Executed manual and automated testing across Dev, UAT, and Production environments; developed Selenium WebDriver automation test cases, achieving a 40% improvement in test efficiency and 20% reduction in execution time.
- Conducted manual mobile testing on Android and iOS devices, validating UI, functionality, cross-device compatibility, and SSO authentication flows.
- Supported CI/CD pipeline integration using Jenkins, Git, and Azure DevOps for continuous testing and deployment.
- Provided testing and deployment support across environments, including build validation, regression testing, defect tracking, and post-deployment verification.
- Tools: Selenium WebDriver, Jenkins, Git, Azure DevOps, Microsoft Intune, MDM, and SSO.

**Test Engineer | eFACiLiTY – ITC Nigeria** *Oct 2024 – Mar 2025*

- Performed manual functional and regression testing for the Time and Attendance and Payroll Modules; designed test cases, executed test cycles, and logged defects to ensure high-quality releases.
- Handled UAT and Production deployments, validating application quality and stability across all environments.
- Supported the project from initial implementation through Change Request (CR) activities, coordinating with the client and providing testing, deployment, and functional support.
- Worked closely with client stakeholders, business analysts, and development teams to understand requirements, validate changes, resolve issues, and ensure successful implementation.

**Test Engineer | eFACiLiTY – Siemens Godrej** *Apr 2024 – Sep 2024*

- Served as a Change Request (CR) Point Tester for the Energy Dashboards and BMS Module; reviewed change requests and designed and executed CR-specific manual test cases for functional, regression, and integration validation.
- Managed end-to-end UAT and Production deployments for the Energy Dashboards and BMS Module, ensuring smooth and successful releases.

**Test Engineer | eFACiLiTY – Prestige Groups** *Jul 2023 – Mar 2024*

- Performed manual functional and regression testing for the Time and Attendance and Helpdesk Modules; acted as the primary point tester for integration, validating all integration touch points manually.
- Managed UAT and Production deployments, ensuring smooth releases with minimal downtime.

**Test Engineer | eFACiLiTY – Indospace Logistics Private Limited** *Feb 2023 – Jun 2023*

- Performed manual end-to-end QA testing for the Tenant Billing System (with access control) and Maintenance Management Module; designed test cases and executed functional and SLA validation tests.
- Conducted UAT sessions with stakeholders; managed UAT and Production deployments and generated weekly and monthly QA status reports.

## EDUCATION

**B.E., Computer Science and Engineering** — Tejaa Shakthi Institute of Technology for Women, Coimbatore, India
