Summary

Software Test Engineer with 3 years of experience in **Manual** and **Automation Testing** across **E-commerce** and **Insurance** domain applications. Proficient in **Selenium WebDriver**, **Java**, **TestNG**, **SQL**, **Postman** and **Jira**, with hands on experience in **functional**, **Regression** and **API**, **Web Applications Testing** and **Mobile Applications Testing** thoroughly. Well versed in **SDLC**, **STLC** and **Agile methodologies** with proven expertise in **Test case design**, **Test execution**, **Defect management** and **Delivering high quality software**.

Technical Skills

Testing Types : Manual Testing, Automation Testing, Functional Testing, Regression Testing, Mobile Applications Testing, Web Applications Testing, API Testing, Cross-Browser Testing
Testing Tools & Frameworks: Selenium Webdriver, TestNG, Maven, Page object Model(POM), Data-Driven Framework, Postman, CI/CD, Git
Languages & Technologies : Java, SQL, HTML
Defect Tracking & Test Management : JIRA, Task Portal, MTT
Platforms & Environments : Web, Mobile(iOS & Android), Windows
Methodologies : Agile, Scrum, Iterative

Work Experience

Hexaware Technologies LTD

April 2022 – April 2025

- Designed, Developed and executed 400+ manual test cases for Functional, Regression, System, End-to-End, API, and Database Testing, improving test coverage by 40% across E-commerce and Insurance applications.
- Developed and maintained 80+ Selenium automation test scripts using Java, TestNG, Maven, Page Object Model (POM), and Data-Driven Framework design principles, reducing manual regression effort by 50% and accelerating release cycles.
- Performed Android and iOS mobile application testing across diverse devices, operating system versions, and network environments, ensuring robust application performance, stability, and platform reliability.
- Identified, documented, and managed 350+ defects using Jira through comprehensive Functional, Regression, and End-to-End Testing, contributing to a 30% reduction in production defects and improving overall application quality.
- Executed and validated test cases with a 95–97% success rate, ensuring stable, reliable, and high-quality software releases.
- Collaborated with cross-functional teams including developers, business analysts, and product owners in Agile environments to analyze requirements, validate defect fixes, and ensure timely delivery of quality software releases.
- Analyzed business and functional requirements to design effective test scenarios and ensure comprehensive test coverage across application modules.
- Conducted Smoke, Sanity, and Cross-Browser Testing prior to production releases, ensuring application stability and release readiness across multiple environments.
- Performed API testing using Postman and SQL database validation to verify data integrity, business logic, and end-to-end application workflows.

Projects

Meta Platform Testing

facebook, Instagram, Messenger, WhatsApp

- Tested community-driven social media and communication platforms that enable global connectivity, user engagement, and business growth. Ensured application quality, performance, security, and seam-

less user experience while supporting features focused on safety, reliability, and inclusivity.

NN-Insurance
Claim Center
- Tested Guidewire ClaimCenter, an insurance claims management platform designed to streamline claim registration, processing, investigation, and settlement workflows. Validated business-critical functionalities, ensuring accurate claims handling, regulatory compliance, and high-quality software delivery.

Certifications and Key Achievements

- **ISTQB Certified Tester Foundation Level (CTFL)**
- **Rockstar of the month recognition awards**

Education

Bachelor of Engineering (B.E.) in Computer Science
Savitribai Phule Pune University
