Skills

Languages/Frameworks: C++,X++,HTML,CSS, JavaScript, SQL, Python

Database: MySQL

Computer Fundamentals:Data Structures, Algorithms, OOPS, Database Design

Software Development Tools: Git, Visual Studio Code

Work Experience

OnActuate, Gurgaon Jan 2024 - Present

Associate Technical Consultant | MS D365 F&O

- Specialized in D365 F&O customization using X++ and SSMS, including forms,classes,tables, developing custom workflows, and security configurations(roles,duty,privilege).
- Designed and developed custom SSRS reports and Excel reports for multiple bottling clients.
- Built reporting & analytics using Excel add-ins and Power BI (connecting to D365 entities, dashboards).
- Delivered synchronous (OData APIs, custom web services) and asynchronous integrations (Recurring Integrations, DMF) using Postman and batch jobs.
- Customized standard D365 F&O features using the extension framework (COC, event handlers) following Microsoft best practices to ensure upgradability and maintainability.
- Implemented **bank integrations** for Vendor Payment Journals with FTP/CSV automation and UTR update.
- Developed Python-based machine learning models for a beverage industry client to forecast future sales using historical D365 F&O data, enhancing demand prediction accuracy and business planning.
- Experienced with LCS (deployments, DB refresh, secret rotation etc) and version control, with a solid understanding of SDLC phases.

Education

Jaypee Institute of Information Technology Noida June 2020 - July 2024
B.TECH in Computer Science and Engineering ***CGPA: 7.9/10***
Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks

St. Johns Sr. Sec. School, Firozabad Apr 2019 - Mar 2020
Class 12th - CBSE ***Percentage: 96.2%***

St. Johns Sr. Sec. School, Firozabad Apr 2017 - Mar 2018
Class 10th - CBSE ***Percentage: 88.3%***

Project Work

- **Food Express | HTML, CSS, JavaScript, PHP, MySQL:** A platform which aims to deliver the food to the users from their desired restaurant, having features of searching, payment and feedback works on both frontend as well as backend.
- **Car Rental System | C++, Linked List, Dijkstra's Algorithm, File Handling:** A platform which provide users to book a ride to their desired locations keeping in mind the shortest distance route is chosen, also making sure the ride assigned is the one that is nearest to your location.
- **RoadGuardian| IOT Components, C++, Arduino IDE:** The system is designed to prevent casualties which happen due to lack of medical assistance in time. It aims to alert the emergency contacts of the injured person by sending the message to them about the accident along with location where the accident took place.

Certificates and Publication

- **Microsoft Dynamics 365: Finance and Operations Apps Developer Associate (MB-500):** Successfully passed the MB-500 exam and achieved certification, demonstrating expertise in Microsoft Dynamics 365 for Finance and Operations app development.
- **Research Paper Publication:** *"Vehicle Accident Detection and Reporting System using Internet of Things"* published in the 5th International Conference on Electronics and Sustainable Communication Systems (ICESC 2024).
