PROFESSIONAL SUMMARY

SDET with 3.7+ years of experience in Manual, Automation, API, and ETL/Data Validation. Skilled in designing test plans, test cases, and building scalable automation frameworks using Selenium and Robot Framework (Python). Strong expertise in SQL-based backend validation, REST API testing, and defect lifecycle management. Proven ability to improve test efficiency, reduce regression cycles, and deliver high-quality releases through CI/CD pipelines in Agile environments. Experienced in leveraging AI-powered tools (Copilot ,ChatGPT) to enhance test design, automation efficiency, and overall software quality.

CORE SKILLS

- **Manual Testing:** Smoke, Sanity, Functional, Integration, System, Regression, End-to-End, UAT, Exploratory, Ad-hoc, Cross-browser, UI, Mobile Testing (Appium - basic)
- **Automation Testing:** Selenium WebDriver (Python), Robot Framework, Playwright (JavaScript), TestNG, Page Object Model (POM), Data-Driven Framework, Regression Automation, Maven, Cross-Browser Automation
- **API Testing:** REST API Testing, Postman, Request & Response Validation, JSON Validation, API Validation, Backend Validation, SoapUI (Basic)
- **Database/ETL:** SQL (Joins, Subqueries, Aggregations, Data Validation), ETL Testing, Data Integrity Validation, Snowflake, Data Warehousing Concepts
- **Tools & Technologies:** JIRA, Zephyr, Jenkins (CI/CD), Git, GitHub, ChatGPT, Copilot
- **Programming Languages:** Java, Python, SQL, JavaScript
- **Methodologies & Concepts:** Agile (Scrum), SDLC, STLC, Defect Life Cycle, Requirement Analysis, Figma UI Validation

PROFESSIONAL EXPERIENCE

Zimetrics Technologies Pvt. Ltd.| SDET I - SDET-III | June 2023 – Present

Project: Nobel BioCare (Healthcare SaaS Platform)

- Performed end-to-end testing across web applications, including UI, API, and backend validation, ensuring complete test coverage and requirement validation.
- Designed and maintained automation frameworks using Selenium and Robot Framework, improving execution efficiency by approximately 40%.
- Automated 300+ test cases across UI and API layers, reducing regression effort by 50–60% while improving test coverage and release quality.
- Prepared test plans, test cases, test data, and test execution reports throughout the software testing lifecycle.
- Validated REST APIs using Postman and performed backend validation using SQL queries to ensure data accuracy.
- Reported, tracked, and managed defects using JIRA while collaborating with developers and business teams to ensure timely resolution.

- Integrated automation suites into CI/CD pipelines using Jenkins and Git, enabling continuous testing and faster release cycles.
- Participated in Agile ceremonies, including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Contributed to testing process improvements by identifying opportunities to enhance automation coverage and testing efficiency.
- Utilized AI-powered tools to accelerate test case design, prepare test data, improve defect documentation, and enhance overall testing productivity.

Project: Snowflake Aviation (ETL/Data Testing)
- Performed end-to-end ETL testing with source-to-target data validation using advanced SQLqueries, including joins, aggregations, reconciliation, and mismatch analysis.
- Developed SQL queries for data validation, transformation checks, and backend verification across ETL pipelines.
- Validated data accuracy, completeness, consistency, and integrity across multiple datasets.
- Automated repetitive data validation activities using Python, reducing manual effort by approximately 30%.
- Prepared test reports, documented defects, and collaborated with development teams to ensure data quality.
- Identified opportunities to improve testing efficiency and contributed to continuous process improvement initiatives.

Project: Fresh Health
- Developed automation scripts using Selenium and Robot Framework, improving test coverage
- Reduced manual effort by 60–70% through automated regression testing
- Performed functional, regression, and integration validation across modules
- Managed defects and test cases using JIRA and Zephyr

PHN Technology Pvt. Ltd. | Software Testing Intern | Apr 2023 - June 2023
Project: Banking application testing
- Designed and executed test cases for functional and regression validation
- Performed manual testing across application modules to ensure requirement compliance
- Conducted backend validation using SQL queries for data accuracy
- Identified and documented defects during testing and collaborated with team members for resolution

EDUCATION

- **BACHELOR OF ENGINEERING** | SPPU University, Pune | 2022 | Percentage: 82.87%

CERTIFICATION

- SDET Certification
- SQL Certification
