RUPALI BHAGAT

QA Engineer

rupalibhagat0509@gmail.com | +91-7498943753 | Pune, India

SUMMARY

Engineering professional with focus on software testing **with 4+ year's experience,** ensuring software quality through rigorous testing and debugging. Experienced in **creating and executing test plans,** identifying and documenting **bugs**, and collaborating with developers to resolve issues. **Strong background in automated testing tools and methodologies.**

EXPERIENCE

LiteHires Global Pvt Ltd, *QA Engineer* 06/2022 – Present

EDUCATION

Bachelor of Engineering (EnTC), *Amaravati University* 2016 | Maharashtra

SKILLS

- Manual Testing
- Agile Methodology
- Automation Testing
- BDD/TDD - Cucumber and TestNG
- Functional Testing
- Test Case Designing
- Core Java
- Extend Report
- Postman expertise
- Bug Tracking Efficiency
- Selenium WebDriver
- POM | XPath | Maven |
- API Testing knowledge
- JIRA & Confluence usage
- Hybrid Framework
- GIT and GITHUB

PROJECTS

Internet Banking Application, *Domain: Retail Banking* 06/2024 – Present

Role: QA Engineer | **Team Size:** 11
Project Description: A secure, scalable internet banking platform offering services like **fund transfers (IMPS, NEFT, RTGS), bill payments, loan applications, balance inquiry, and account management.**

- Designed and executed **test cases for inventory, procurement, billing, and route planning modules.**
- Performed **UI, Functional, E2E,** and **Exploratory testing** on **Web and Android/iOS apps.**
- Conducted **manual testing** of modules including **dashboard, transaction history, & fund transfers.**
- Validated complete fund transfer workflows: **own account, third-party, and interbank transfers.**
- Executed functional, **UI/UX, and boundary condition testing across web platforms.**
- Developed and executed **automation test scripts** using **Selenium WebDriver, TestNG, and POM.**
- Validated **database transactions** with **SQL/MySQL queries** for consistency and correctness.
- Logged, tracked prioritized **bugs/defects using JIRA**; connect with developers for faster resolution.
- Designed and ran **BDD scenarios using Cucumber** for better collaboration with BA & Dev teams.

Tools & Technologies: Manual Testing, API testing, Automation Testing using - Selenium WebDriver, Java, TestNG, Cucumber (BDD), Maven, GitHub, JIRA, MySQL, Postman (for API smoke testing)

Loan Origination System, *Domain: Banking - Digital Lending* 07/2022 – 05/2024

Role: QA Analyst (Hybrid Role - Functional + Automation) | **Team Size:** 9
Project Description: A fully digital Loan Origination System that automates the lifecycle of loan processing **from lead capture, credit checks (CIBIL), application intake, underwriting, document verification, approval, to final disbursement.** The platform ensures compliance with lending policies and reduces processing time.

- Wrote and executed **functional, regression, smoke, and UAT test cases** across various loan stages.
- Automated repetitive test cases using **Selenium WebDriver, TestNG,** and **data-driven framework.**
- Collaborated with developers and product teams for defect resolution.
- Worked extensively on **Fin One Neo modules (QDE, DDE, Underwriter, Sanction, etc.).**
- Tested LMS modules: **EMI scheduling, Loan Closure, NOC.**
- Generated detailed **Test Reports** and **Status updates using JIRA.**
- Created **Cucumber feature files** business-readable test scenarios & integrated them in automation.
- Performed **backend testing** by writing complex **SQL queries** to validate loan data across multiple stages (e.g., **application, underwriting, disbursement).**
- Logged bugs in **JIRA**, prioritized based on severity, ensured end-to-end defect lifecycle management.
- Actively contributed to Agile ceremonies- **sprint planning, grooming, reviews, & retrospectives.**
- Maintained automation scripts in **Git**, managed builds using **Maven**, and ensured CI compatibility.

Tools & Technologies: Manual Testing, Automation testing, Functional Testing Selenium WebDriver, Java, Cucumber, SQL, Git, Maven, JIRA, Browser Stack (for cross-browser testing), Postman
