PROFESSIONAL SUMMARY

- With **5.6 years** of comprehensive experience in total IT industry (Customer Engagement) and Power Platform development & .NET Development skills.
- **5+ years** of hands-on experience in developing, customizing, and optimizing Microsoft Dynamics 365 **Customer Engagement** (CE) solutions.
- Proficient in customizing **entities, forms, views**, and dashboards to meet unique business requirements.
- Expertise in configuring **business rules, workflows**, and business process flows to automate processes.
- Skilled in developing custom plugins and workflows **using C# and .NET** to extend Dynamics 365 CE functionalities.
- Strong knowledge of C#, .NET, JavaScript, SQL Server, and FetchXML.
- Familiar with **Plugin development** and custom logic development for system integrations.
- Proven ability to manage development projects, collaborate with stakeholders, and deliver solutions on time and within budget.
- Excellent communication skills to effectively gather **requirements** and provide technical support to end-users.
- Committed to staying current with the latest developments in **Dynamics 365 CE and Power Platform** technologies.
- Adaptable and quick to learn new tools and methodologies to enhance solution delivery.
- Strong analytical and **problem-solving abilities** to identify issues, develop solutions, and improve system performance.
- Implemented role-based **access control and field-level security** to safeguard sensitive data and ensure compliance with organizational policies.
- I have a proven track record of designing, implementing, and optimizing robust business solutions.

WORK EXPERIENCE

- HCL Tech
  - July - 2024 to till Date
- Softtek
  - March - 2024 to July - 2024
- EY
  - Oct - 2021 to April 2023
- Capgemini
  - Feb - 2019 to Oct 2021

SKILLS

- MS Dynamics CE Online
- Customization and Configuration
- Plugin Development
- Workflows and Business Process Flows
- Security and Role Management
- C#, .NET, JavaScript
- SQL Server, FetchXML
- PowerApps
- (Canvas and Model-Driven Apps)
- Power Automate (Flow creation and management)
- APIs, Custom Connectors

EDUCATIONAL

- **B.Tech**
  - **JNTU**

Project: -4
Title: World Bank
Role: Microsoft Dynamics CE Developer
Domain: Banking Domain

Project Summary:

- The World Bank is a leading international financial institution dedicated to fostering global economic development. It provides financial assistance in the form of loans and grants to the governments of low- and middle-income countries, enabling them to undertake critical capital projects that drive growth and improve living standards.
- The term “World Bank” collectively refers to two key institutions: the International Bank for Reconstruction and Development (IBRD) and the International Development Association (IDA), which are part of the five organizations comprising the World Bank Group.

Roles and Responsibilities:

- Designed custom BPFs and multi-stage workflows to automate loan approvals, grant disbursements, and fund tracking processes.
- Implemented custom FetchXML queries for advanced reporting and optimized data retrieval from large datasets.
- Developed server-side plugins to validate financial compliance rules before processing loan requests.
- Integrated Dynamics 365 CE with payment gateways and financial risk assessment APIs to streamline funding operations.
- Designed audit trails to track user activities and ensure data security as per World Bank compliance standards.
- Conducted code reviews and implemented performance tuning to improve solution efficiency and scalability.

Project: -3
Title: Tandem Diabetes Care
Role: Microsoft Dynamics CE Developer
Domain: Health Domain
Project Summary:

- Tandem Diabetes Care recognized that integrating enhanced usability and modern, consumer-inspired design into their products could encourage more patients to explore and adopt the clinical benefits of insulin pump therapy.

Roles and Responsibilities:

- Designed and configured custom entities, forms, views, dashboards, and business process flows (BPFs) to manage patient therapy data and device usage.
- Developed plugins, custom workflows, and Power Automate flows to automate therapy approvals, device allocations, and follow-up reminders.
- Implemented JavaScript-based client-side validations to ensure accurate patient data entry and improved usability.
- Configured security roles and field-level security to protect sensitive patient information and comply with HIPAA guidelines.
- Built Power Apps for healthcare practitioners to manage patient therapies, schedule follow-ups, and monitor device performance.

Project: -2
Title: Department of Health (DOH)
Role: Microsoft Dynamics CE Developer
Domain: Health Domain

Project Summary:

- DOH is a project under Cloud for Health in the Oceania region, designed to provide a comprehensive digital environment for patients and healthcare practitioners. The platform facilitates efficient management of patient medications, monitors drug interactions, identifies risk factors, and streamlines follow-up care to enhance overall healthcare outcomes.

Roles and Responsibilities:

- Developed custom canvas apps for patients to view prescriptions, monitor medications, and receive health alerts.
- Designed custom dashboards to monitor patient risk levels, drug interaction alerts, and follow-up compliance trends.
- Automated patient engagement workflows using adaptive cards within Microsoft Teams for practitioner updates and alerts.
- Built custom data models to manage drug libraries, risk assessment matrices, and interaction scenarios efficiently.
- Collaborated with healthcare regulators to ensure the solution adhered to HIPAA and local healthcare compliance standards.

Project: -1
Title: John Deere India Pvt ltd
Role: Microsoft Dynamics CE Developer
Domain: Manufacturing Domain

Project Summary:

- John Deere, the brand name of Deere & Company, is a leading American multinational corporation specializing in the manufacturing of agricultural, construction, and forestry machinery, as well as diesel engines, heavy equipment drivetrains, and lawn care equipment.

Roles and Responsibilities:

- Designed dealer management modules to track equipment inventory, customer orders, and maintenance schedules.
- Developed custom APIs for seamless integration between Dynamics 365 CE, ERP systems.
- Created complex business rules to automatically validate warranty periods, service eligibility, and equipment serial numbers.
- Leveraged Azure Service Bus to manage asynchronous communication between CRM, inventory systems, and dealer portals.
- Led training workshops for dealers and internal stakeholders to ensure effective usage of the platform’s features.
