Ruchita Madarpalle

Pune Maharashtra-411041|9730214905|ruchitam2798@gmail.com| **QA Automation Engineer**|5.4 year experience

PROFESSIONAL SUMMARY

QA Automation Engineer with 5.4 years of experience in test automation, skilled in Selenium, Java, Maven, API Testing, TestNG, Cucumber, SQL, and CI/CD. Specialized in Banking and Insurance domains with experience in AI-assisted automation solutions that reduce testing time and improve efficiency. Passionate about delivering high-quality software and solving complex testing challenges.

TECHNICAL SKILLS

- **Programming Language**: Java,Python
- **Automation Testing**: Selenium WebDriver, Playwright, TestNG, Cucumber, JUnit, Maven,Page Object Model (POM), Data-Driven Framework, Hybrid Framework
- **API Testing**: Postman, REST Assured, SOAP UI, Swagger, REST APIs, JSON, XML
- **Database Testing:** SQL, MySQL, Oracle
- **Testing Types:** Functional, Regression, Smoke, Sanity, Integration, System, End-to-End, UI, API, Database, UAT, Compatibility, Performance
- **Cross-Browser & Parallel Testing:** BrowserStack, Cross-Browser Testing, Parallel Execution, Headless Testing
- **Build & CI/CD:** Maven, Jenkins, GitHub Actions, Docker
- **Test Management & Defect Tracking:** Jira, HP ALM/QC, Zephyr
- **Version Control:** Git, GitHub
- **Test Reporting:** Allure Reports, Extent Reports
- **AI-Assisted Testing**: ChatGPT, GitHub Copilot, Microsoft Copilot, AI-Assisted Test Case Generation, Test Script Generation, Test Data Generation, Test Failure Analysis
- **Other Skills:** LLMs, RAG, AI Agents, Prompt Engineering, LangChain, LangGraph, n8n, Vector Databases, Embeddings, NLP, and AI Evaluation (BLEU, ROUGE).
- **Methodologies & Processes:** Agile Scrum, SDLC, STLC, Defect Life Cycle

WORK EXPERIENCE

- **QA Automation Engineer** at Shreeyaj Enterprises
- **System Engineer** at Infosys Limited
- **Associate QA Engineer** at Humanus Global Private Limited

EDUCATION

Rajarshi Shahu Mahavidyalaya, Latur| M.Sc. (Computer Science)

SRTM University | Bachelor of Science

PROJECTS DETAILS

Project: Banking Payout Management System

- Developed and maintained **UI and API automation scripts** using **Playwright, Selenium WebDriver, Java, TestNG, Maven, and REST Assured,** reducing manual regression effort by 30%.
- Automated key payment and payout workflows including **beneficiary management**, **payment initiation, payout initiation, approval workflows, transaction processing, reconciliation, and payout status tracking.**
- Tested **UPI and card payment flows** using positive and negative scenarios, including successful, **failed, declined, timeout, duplicate, and invalid transactions.**
- Performed **Functional, Smoke, Sanity, Regression, Cross-Browser, Integration, and End-to-End Testing** across payment and payout modules.
- Validated **REST APIs** using **REST Assured and Postman**, verifying request/response payloads, HTTP status codes, headers, authentication, business validations, and negative scenarios.
- Performed **SQL database validation** using **MySQL** to verify transaction, beneficiary, payment, payout, and reconciliation data.
- Validated **payment transaction status across UI, API, and database layers**, ensuring consistency between transaction responses and backend records.
- Tested **reconciliation scenarios** by comparing transaction/payment records with corresponding payout and information and identifying data mismatches.

- Tested an **AI-powered RAG chatbot**, validating **document retrieval, context relevance, response accuracy, response quality, and hallucination scenarios** against approved source information.
- Performed **AI Agent testing** by validating **multi-step workflows, prompt execution, tool/function calling, error handling, and end-to-end agent behavior**.
- Validated **LLM responses** using positive, negative, ambiguous, and unsupported queries to check **relevance, factual consistency, hallucinations, and response consistency**.
- Designed repeatable **AI validation scenarios** by comparing generated responses against expected results and defined source information.
- Integrated automation suites with **Jenkins CI/CD** and generated execution reports for continuous regression validation.
- Managed defects using **JIRA** and collaborated with developers and business analysts throughout the **Agile Scrum** lifecycle.

Project: Insurance Policy Management

- Analyzed **Business Requirement Documents (BRD)** and prepared Test Scenarios and Test Cases.
- Performed **Functional, Smoke, Sanity, Regression, Integration, and User Acceptance Testing (UAT**) for insurance modules.
- Tested **policy issuance, customer onboarding, premium calculation, claims processing,** and **policy renewal workflows.**
- Logged, tracked, and verified defects using **JIRA** and participated in **defect review meetings.**
- Validated backend data using **SQL with Oracle** databases.
- Towards the final phase of the project, automated selected regression test cases using **Selenium WebDriver, Java, TestNG, Maven, and Page Object Model (POM).**
- Participated in **Agile Scrum ceremonies,** including Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.
