SAIKAT DAS

Full Stack Developer

E-mail: saikatdas.tit2023@gmail.com
Phone: 9612121285
Bengaluru, India
linkedin.com/saikatdas2000

Software Developer with 2.2 years of experience building scalable APIs and web applications in product-based environments. Skilled in Python, FastAPI, SQL, JavaScript, Node.js, and Angular. Experienced in designing automation tools and chatbots, improved efficiency by 40% and reduced response times by 35%. Proficient in Docker, CI/CD pipelines, VPS and Linux server deployment, and NGINX configuration. Focused on creating maintainable, high-performance software that enhances user experience and business outcomes.

TECHNICAL SKILLS

Back-end: Python (FastAPI, Django), Node.js, Express.js
Front-end: Angular,React.js , CSS3, HTML5
Programming Languages: Python, JavaScript
Database: MySQL
DevOps: Docker, CI/CD, VPS Hosting, NGINX, Linux
Tools: VS Code, PyCharm, Git, Postman

DEVELOPMENT SKILLS

- Bug Fixing
- Requirement Gathering
- API Debugging
- CI / CD
- Docker,Linux,VPS
- VPS Hosting
- RESTful APIs, Microservices

EDUCATION

Tripura Institute Of Technology

B.Tech Electronics and Communication
CGPA: 8.06/10
Oct 2020 – June 2023
Agartala, Tripura

ACHIEVEMENTS

Secured 3rd position among 100 + teams in the Government of Tripura's Startup Competition for developing "PlannerHut.".

LANGUAGES

English | Hindi | Bengali

WORK EXPERIENCE

Engineer I Full Stack Developer | Neewee Analytics

Mar 2024 – Nov 2025

- Engineered and optimized scalable RESTful APIs using Python (FastAPI) and Node.js, improving API response times by 25% and reducing downtime by 20%.
- Enhanced Angular-based UI modules, boosting responsiveness and increasing user engagement by 20% through cleaner UI and improved workflows.
- Designed and implemented internal automation tools using Python, FastAPI, and Pandas, cutting manual data handling time by 40%.
- Architected AI-powered chatbot solutions using Python, FastAPI, and Ollama, reducing customer response time by 35% and improving user satisfaction scores.
- Partnered with cross-functional teams and clients in requirement analysis, technical design, and delivery planning, ensuring 95% on-time release rate.

Intern | Neewee Analytics

Aug 2023 – Feb 2024

- Collaborated in developing IoT-based systems using a three-layer architecture (Device–Gateway–Server) to support data integration across 500+ IoT nodes.
- Resolved 15+ production-level bugs in front-end and back-end systems, ensuring consistent product uptime and reliability.
- Assisted in optimizing IoT gateway configurations, improving network stability and reducing latency by 18%.

PROJECTS

Doctor Bondhu (www.doctorbondhu.in)

Doctor Appointment Booking App

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js), Cloudinary

● Built a full-stack medical booking system with secure authentication and role-based access control.
● Managed VPS hosting, SSL configuration, and NGINX deployment.
● Implemented admin dashboards, CRUD APIs, and image upload features using Cloudinary.

IoT Based Server Room Monitoring System

Three-Layered IoT Device System

Engineered a Three-Layer IoT Device For Server Rooms for Temperature monitoring With a Responsive UI
