SAPNA CHOUHAN

QA Automation Engineer | Selenium (Java) | Playwright (JS/TS) | API & Performance Testing

Indore, Madhya Pradesh, India | sapnachouhan1010@gmail.com | +91 9516596554

Professional Summary

QA Engineer with 3.5+ years of experience in Manual and Automation Testing across Web, Mobile, and E-commerce platforms, currently delivering automation for enterprise banking and recruitment-tech clients on contract engagements. Hands-on expertise in Selenium WebDriver (Java) with BDD/Cucumber, Playwright (JavaScript), TestNG, and the Page Object Model, combined with strong manual testing skills covering functional, regression, smoke, sanity, and cross-browser testing. Skilled in API testing with Postman and performance testing with JMeter. Experienced in AI/GenAI validation workflows, including hallucination detection and prompt-accuracy testing. Comfortable working in Agile/Scrum teams with CI/CD pipelines (Jenkins, GitHub Actions), JIRA-based defect tracking, and direct client communication. Known for strong analytical thinking, ownership of test coverage, and consistent, quality-focused delivery.

Core Technical Skills

- Automation Testing: Selenium WebDriver, Playwright, TestNG, BDD/Cucumber, Page Object Model (POM), AI-Driven Application Testing (Kusho AI)
- Manual Testing: Functional, Regression, Sanity, Smoke, GUI, Cross-Browser Testing, SDLC, STLC
- API & Performance Testing: Postman, JMeter (Basic)
- Programming / Scripting: Java, JavaScript
- CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub, Bitbucket
- Test & Project Management: JIRA, Trello, Maven (Build Tool)
- Methodology: Agile, Scrum

Professional Experience

Techvalens Software Systems Pvt. Ltd. — QA Engineer (Manual & Automation) *Jan 2023 – Present**

Indore, MP | Deployed on client contract engagements and internal product projects

Client Engagement: Westpac (Contract) *May 2026 – Present*

Tools: Selenium WebDriver, Java, BDD/Cucumber, TestNG

- Automating regression and functional test suites for banking application workflows using Selenium WebDriver with Java, following the BDD/Cucumber framework.
- Writing Gherkin feature files and step definitions to align test scenarios with business requirements and Agile acceptance criteria.
- Collaborating with onshore/offshore Agile teams on sprint planning, test estimation, and release readiness.

Client Engagement: HCL Technologies (Contract) *Nov 2025 – Feb 2026*

Tools: Playwright, JavaScript

- Built and maintained end-to-end automation scripts using Playwright for web application regression coverage.
- Designed reusable, modular automation components following the Page Object Model to reduce script maintenance effort.
- Integrated automated test suites into the CI/CD pipeline to enable faster regression feedback for each build.
- Reported and tracked defects, and coordinated with developers on root-cause analysis and fixes.

Project: Evluate — AI-Powered Recruitment Platform *Apr 2024– Nov 2025*

Tools: Playwright, Selenium, TestNG, Postman, JMeter, Kusho AI

- Automated core web flows and regression scenarios using Playwright (JavaScript).
- Performed manual UI, functional, integration, and system testing across the platform.
- Validated AI behavior including hallucination detection and prompt accuracy in candidate assessments.
- Conducted API testing using Postman and performance testing using JMeter.
- Created and maintained test cases and test data, and documented results across Agile sprints.
- Used JIRA for sprint tracking and defect logging; coordinated build validation and release sign-off with the client.

Project: Kat'z Delicatessen — E-commerce Website *Oct 2023 – Apr 2025*

Tools: Selenium (Java), TestNG, Maven, Trello

- Performed functional testing of the e-commerce ordering and delivery workflows.
- Created and executed manual test cases and scenarios; identified and reported defects.
- Performed cross-browser testing to ensure consistent functionality across platforms.
- Developed automation scripts using Selenium WebDriver with Java.

Project: Q-Skipper — Mobile Application & Web *May 2023 – Sep 2023*

Tools: JIRA, Postman

- Performed functionality, integration, and system testing on the mobile appointment-booking application.
- Identified and reported bugs, and coordinated with the Test Lead and development team for tracking.

Project: TV-Attendance — Computer Vision Attendance System *Feb 2023 – May 2023*

Tools: Trello, Postman

- Performed manual testing including UI, functional, integration, system, and regression testing.
- Created detailed test cases, identified defects, and worked with the dev team on fixes.
- Performed API testing using Postman.

Key Achievement

- Project Coordinator — Evluate: Led and coordinated project activities while continuously improving QA processes and ensuring alignment with project goals.

Education

SAGE University, Indore (MP) — Master's in Computer Application (MCA) *2021 – 2023*

Mata JijaBai Girls PG College, Indore (MP) — Bachelor's of Computer Science (B.Sc CS) *2017 – 2020*
