Uttarakhand(Dehradun), India

PYTHON DEVELOPER

Product Engineer skilled in building AI-driven CRM solutions with **Python, FastAPI, PostgreSQL, Git, and React.** Leveraging a strong foundation in back-end development from prior work with **Flask, Dash, AWS, and MongoDB**, I excel at driving impactful, integrated projects and delivering exceptional user experiences.

KEY SKILLS

- **Programming:** Python, OOPs, Data Structure, HTML, CSS, ReactJs
- **Cloud Services**: AWS Lambda, AWS Ec2, S3, AWS amplify
- **Databases, Frameworks & Environments**: FastApi, Flask, REST APIs, Websocket APIs, GIT + Github, MongoDB, MYSQL, Postgresql, Supabase, Neon
- **IDE Tools**: PyCharm, VS Code, Google Colab, Jupyter
- **Data Processing & Visualisation**: Numpy, pandas, Dash, Jupyter, Matplotlib, seaborn

---

PROFESSIONAL EXPERIENCE

ParamyterTech(HyeGro, Dehradun)

October 2024 - Present

Product Engineer

- **Project Overview**: Working on an AI-driven CRM at Paramyter Tech, designed to be the world's most affordable CRM, bringing advanced CRM capabilities to growing businesses and startups at a low cost.
- **Backend Development**: Implementing **FastAPI, PostgreSQL, and Neon** to create a robust, scalable backend that enables efficient data handling, **AI-powered insights, and fast API responses**.
- **Front-end Interface**: Using React to build an intuitive, user-friendly interface that enhances the CRM's accessibility and usability, ensuring smooth interaction for end-users.
- **Multi-tenancy and APIs**: Developed **multi-tenancy** to securely support multiple organizations with isolated data, alongside creating essential APIs to enable seamless, reliable data flows and functionality across the platform.

Zupinn Business Slt. (Dehradun)

June 2023 - October 2024

Python Developer

- **Project Leadership:** Independently manage a stock market **automation project** within a **Fintech startup**, overseeing the full automation of buy and sell transactions using advanced algorithms.
- **Tech Stack Expertise:** Work with a diverse stack including **Python, Flask, RESTful and WebSocket APIs, Git, AWS, HTML, and CSS**, covering both **back-end** and **front-end development**.
- **Real-Time Data Management:** Handle **real-time data communication** and **processing**, ensuring accuracy and efficiency in stock trading operations.
- **Automation & Optimization:** Implement automated workflows and data handling processes, enhancing trading performance and optimizing the overall system for seamless functionality.

ADEPTIA IND.PVT.LTD. (Noida)

September 2022 - May 2023

Software Engineer

- **Client Issue Resolution**: Played a pivotal role in addressing and resolving code-related issues reported by clients, with a focus on enhancing AI integration within ETL processes.
- **Troubleshooting & Debugging**: Actively worked on troubleshooting and debugging to ensure smooth, uninterrupted operation of the system and improve overall functionality.
- **Quality & Efficiency**: My efforts directly contributed to the seamless performance of AI-driven ETL processes, demonstrating a strong commitment to high-quality, reliable solutions.
- **Client-Centric Approach**: This role strengthened my problem-solving skills and reinforced my dedication to meeting client needs in a dynamic, client-focused setting.

PROJECTS

AI-DRIVEN CRM: HyeGro

Role: Product Engineer | Company: Paramyter Tech | Technologies: Python FastAPI, PostgreSQL, ORM, Neon, React.js, Material UI, GIT & Github

- Designed and developed both backend and frontend components of an AI-driven CRM platform.
- Built scalable and secure APIs using Python FastAPI, leveraging PostgreSQL with ORM for efficient data management.
- Implemented multitenancy to support multiple organizations with isolated data storage.
- Integrated Supabase for real-time database operations and user authentication.
- Developed dynamic, responsive, and user-friendly CRM pages using React.js and Material UI.
- Collaborated with cross-functional teams to deliver optimized, high-performance features.
- Ensured seamless data flow between frontend and backend, enhancing user experience.

STOCK MARKET AUTOMATION

- **Automated Stock Trading**: Developed a **Python-based** solution to automate stock trading processes, leveraging algorithmic strategies to optimize buying and selling decisions.
- **User-Friendly Interface**: Integrated **Dash** and **Flask** frameworks to create an intuitive interface for users to monitor and manage automated trading activities effectively.
- **Real-Time Market Analysis:** Leveraged **NumPy** and **Pandas** for streamlined data processing, integrated **TA-Lib** for technical analysis, and employed **Pymongo** for **MongoDB** interaction. Combined with **WebSocket API** for **real-time data streaming**, enabling swift and precise market analysis.
- **Scalable Deployment**: Deployed the system on **Amazon EC2 instances**, ensuring scalability and reliability, with **Git** for version control, enhancing collaboration and code management efficiency.
- **Time Series Data Handling:** Utilized specialized libraries to handle **time series data**, ensuring accurate forecasting and trend analysis for better trading decisions.

DOON ANIMAL WELFARE

- **Animal Welfare Platform**: Collaborated on completing an Animal Doon Welfare project using React.js, Node.js, and MongoDB.
- **React.js Frontend Development**: Participated in building the frontend interface using React.js, ensuring a responsive and intuitive user experience for interacting with the platform.
- **Node.js Backend Integration**: Contributed to integrating backend functionalities using Node.js, enabling efficient data processing and handling of user requests.
- **MongoDB Database Management:** Assisted in managing the MongoDB database, ensuring seamless storage and retrieval of data related to animal welfare activities and user interactions. Collaborated with a teammate to complete the remaining tasks and enhance the project's functionality.

EDUCATION

B.Tech - Computer Science Engineering (2018 - 2022)

Dev Bhoomi Group of Institution

Senior Secondary School | 2018

Shri Guru Ram Rai Public School(TALAB)

Secondary School | 2016

Shri Guru Ram Rai Public School(TALAB)
