SHVETA NARAYAN KHANDAGALE

Software Quality Engineer |Automation Test Engineer

mobile No: +91 8380086728

Email: shveta180620@gmail.com

https://www.linkedin.com/in/shveta-khandagale

Address: Pune, Maharashtra

Professional Summary:

Experienced Software Quality Engineer with **4+ years** of experience in Manual and Automation Testing of enterprise applications in Banking and Healthcare domains.
Proficient in Selenium WebDriver with Java, TestNG, BDD Cucumber, API Testing using Postman, and SQL database validation.
Strong understanding of SDLC, STLC, Agile Scrum methodology, defect life cycle, and test automation frameworks.
Hands-on experience in functional testing, regression testing, sanity testing, API testing, and cross-browser testing.
Technical background in Core Java, REST APIs, and Microservices, enabling effective collaboration with development teams.

Technical Skills:

Automation Testing

- Selenium WebDriver with Java, TestNG Framework, Playwright
- BDD Cucumber, Page Object Model (POM), Data Driven Framework, Hybrid Framework

Manual Testing

- Functional Testing, Regression Testing, Sanity Testing, Re-Testing, Non-Functional Testing
- UAT Testing

Programming

- Core Java (OOPs, Collections, Exception Handling)

API Testing

- Postman, REST API Testing, Swagger

Database

- SQL, MySQL, Oracle, PostgreSQL

Tools

- JIRA, Git, GitHub, Maven, Jenkins, Eclipse, Apache Tomcat, Devtool, SourceTree, Bitbucket

Methodology

- Agile Scrum, SDLC, STLC, Defect Life Cycle

Project 1: **WESTPAC Banking Application**

Domain: Investment Banking & Financial Services

Role: Software Quality Engineer (Manual & Automation Testing)

Technologies: Selenium WebDriver, Java, TestNG, BDD Cucumber, REST API, Postman, SQL, Maven, Git, JIRA

Project Description:

The Westpac Banking Application is an enterprise-level digital banking platform developed to support customers and internal banking operations for secure financial services. The system enables users to perform various banking activities such as account management, fund transfers, bill payments, transaction history tracking, and customer profile management through web-based applications.

The application integrates multiple banking services including customer onboarding, account services, payments, loan management, and reporting modules. It ensures secure financial transactions, regulatory compliance, and real-time data processing across different banking channels.

The platform is designed to deliver high performance, security, and scalability while supporting millions of banking transactions and customer interactions.

Responsibilities:

- Participated in Sprint Planning, Daily Stand-ups, and Retrospective meetings in Agile environment.
- Analyzed user stories and acceptance criteria to design test cases.
- Created functional and non-functional test cases based on requirements.
- Executed manual test cases and validated application behavior.
- Performed Sanity Testing, Functional Testing, Regression Testing, and Re-testing.
- Identified defects and reported them using JIRA defect management tool.
- Worked with developers to reproduce and prioritize defects.
- Conducted exploratory testing to find edge case issues.
- Prepared daily test execution reports and defect tracking reports.
- Participated in User Acceptance Testing (UAT) support.

Automation Testing Responsibilities

- Developed Automation Test Scripts using Selenium WebDriver with Java.
- Implemented Page Object Model (POM) framework for maintainable test scripts.
- Used TestNG framework for test execution and reporting.
- Integrated BDD Cucumber framework for behavior-driven testing.
- Performed Cross Browser Testing using Selenium.
- Implemented Implicit and Explicit waits for synchronization.
- Automated UI test cases using XPath locators.
- Handled Popups, I frame, Dropdowns, and Mouse Hover operations using Selenium.

API Testing

- Performed REST API testing using Postman.
- Validated request and response payloads.
- Verified API response codes and JSON data.
- Performed database validation using SQL queries.

Project 2: **Northern Trust Wealth Management Platform**

- **Domain**: Banking / Wealth Management
- **Role**: Software Quality Engineer (Manual + Automation Tester)
- **Technologies**: Selenium WebDriver, Java, TestNG, BDD Cucumber, REST API, Postman, SQL, Maven, Git, JIRA

Project Description:

Northern Trust Wealth Management Platform is a banking and financial services application used to manage client investment portfolios, account services, asset management, and financial transactions.

The system enables financial advisors and banking users to manage client accounts, portfolio performance, transaction processing, fee calculations, and reporting. It integrates with multiple internal banking systems to provide real-time financial data, secure transactions, and regulatory compliance.

The platform supports wealth management operations, investment tracking, portfolio analytics, and financial reporting, ensuring secure handling of client financial information and seamless banking operations.

Responsibilities:

- **Manual Testing**

Analyzed business requirements and user stories related to banking and wealth management modules.

- Prepared test scenarios and detailed test cases for account management, portfolio tracking, and transaction modules.
- Executed Functional Testing, Regression Testing, Sanity Testing, and Re-testing.
- Validated financial transactions, account details, and investment data accuracy.
- Performed User Acceptance Testing (UAT) with business stakeholders.
- Logged and tracked defects using JIRA and followed the Defect Life Cycle.
- **Automation Testing**
- Developed automation scripts using Selenium WebDriver with Java.
  implemented Page Object Model (POM) framework for test automation.
- Used TestNG framework for execution and test management.
- Implemented BDD Cucumber framework for behavior-driven testing scenarios.
- Automated regression test suites for account services, transaction workflows, and reporting modules.
- Performed Cross Browser Testing for banking web applications.

Certifications:

- Certified Advanced Selenium Tester - Infosys
- Certified Java Programmer - Infosys
- Certified BDD Cucumber Automation Tester – Infosys
- Certified Rest Assured– Infosys
- Certified Global Agile Developer – Infosys
- Microsoft Certified: Azure AI fundamentals AI900

Education:

Master of Computer Science (MSC) - 2023
