Shashank Bajpai

QA Analyst

linkedin.com/in/shashankbajpai88

- **Seasoned Testing Expertise:** Showcased 3+ years of expertise in Selenium WebDriver and Page Object Model for optimised testing outcomes.
- **Comprehensive Testing Acumen:** Proficient in Data Driven Testing, Cross Browser Testing, and Parallel Test Execution, with a strong grasp of SDLC and STLC methodologies.
- **Spearheaded the development of a robust automation framework** encompassing both UI and API functionalities using Java, streamlining processes and enhancing efficiency.
- **Demonstrated expertise in managing API status codes** and efficiently navigating API documentation through Swagger, ensuring precision and accuracy in project execution.
- Mastered the intricacies of JSON request and response, enabling seamless communication and data exchange, while adeptly designing POJO classes to optimise POST request and response body structures, thereby enhancing system performance and reliability.
- **Efficiency Enhancement:** Successfully transformed manual test cases into Automation Sanity and Regression suites, streamlining testing processes for enhanced efficiency.
- **Thorough Test Documentation:** Skilled in preparing comprehensive Test Documentation, Test Plans, Test Data, Test Cases, and Defect Reports to facilitate thorough testing procedures.
- **Automation Tool Proficiency:** Experienced in utilising Automation Testing tools such as Selenium WebDriver, TestNG, and Jenkins to streamline Continuous Integration processes.
- **Recent Achievement:** Recently developed an Automation Test Script using Selenium WebDriver and TestNG in JAVA, contributing to improved testing efficiency.
- **Testing Expertise:** Proficient in Functional and Non-Functional Testing, Mobile Testing and Regression Testing.
- **Strong Interpersonal Skills:** Possess excellent interpersonal and analytical skills, complemented by a strong background in client communication, ensuring effective collaboration and understanding of project requirements.

Skills

Automation Tools	Selenium WebDriver, TestNG
Programming	Java
Frameworks	Page Object Model (POM), Data-Driven Framework
API Testing	Postman, Rest Assured
CI/CD	Jenkins, Maven
Database	SQL
Other Tools	JIRA, Git, Swagger, JMeter, GitHub Copilot, ChatGPT
Testing Types	Functional, Regression, Sanity, API, Cross-Browser, Integration Testing
Methodologies	Agile, SDLC, STLC

Technical Experience

QA Analyst — **June 2022 — Present**
Xoriant Solutions Pvt. Ltd. — *Bengaluru*

- Analyzed business requirements and translated them into detailed test scenarios, test cases, and test data.
- Executed manual and automated test cases, analysed results, and reported defects using structured defect tracking processes, ensuring timely resolution.
- Designed and maintained automation test scripts using **Selenium WebDriver**, following the **Page Object Model (POM)** design pattern.
- Developed and enhanced automation frameworks, increasing test coverage and execution efficiency.
- Performed **functional, regression, sanity, and data-driven testing** to ensure application stability across releases.
- Conducted **cross-browser testing** to validate application behavior across multiple environments and browsers.
- Conducted **API testing** with tools like Postman, integrating API validations into test scenarios.
- Participated in **CI/CD processes using Jenkins**, executing automated test suites as part of build pipelines.
- Converted manual test cases into scalable automation scripts, reducing manual effort and improving testing efficiency.
- Performed **database validation using SQL queries** to ensure data integrity and consistency across systems.
- Collaborated with developers, business analysts, and stakeholders to resolve defects and improve application quality.
- Maintained **test reports, defect reports, and status dashboards** for daily and weekly visibility of testing progress.
- Actively participated in **integration, system, and user acceptance testing (UAT)** phases to ensure end-to-end quality delivery.
- Ensured proper documentation and version control of test artifacts throughout the testing lifecycle.
- Identified test automation opportunities and optimized existing test processes, contributing to improved test coverage and reduced execution time.

Highlights

- Executed test scenarios, managed communication, and contributed to Automation Testing frameworks.
- Implemented a new Automation Test Strategy, increasing test coverage and decreasing post-release defects.
- Spearheaded migration of manual test cases to automated framework, streamlining testing and reducing manual effort significantly.
- Led development of Automation Infrastructure using Selenium, conducted various testing, managed communication, and ensured data integrity via SQL Queries.
- Conducted review of test processes, identifying optimization opportunities, resulting in increase in testing efficiency and decrease in overall testing costs.

Education

Bachelor of Computer Applications, *Doon Business School* May 2022

Awards

- Received kudos for excellent performance in the team. 2025
