PROFESSIONAL SUMMARY

Results-oriented QA Automation Engineer with around 3+ years of experience in designing, developing, and maintaining UI automation frameworks. Proficient in **Java, Selenium WebDriver, Cucumber (BDD)**, and **Page Object Model (POM)**, with solid expertise in manual testing. Experienced in **API testing using Rest Assured and Postman**, along with database validation using **SQL** and Oracle DB. Skilled in improving testing efficiency through automation, managing the complete Agile testing lifecycle, troubleshooting complex workflows, and using **JIRA and TestRail for defect tracking** and quality assurance.

SKILLS

- **Automation** : Java, Selenium WebDriver, TestNG, BDD Cucumber Framework, Page Object Model(POM)
- **DevOps/Tools** : Git, GitHub, JIRA, Testrail
- **Database/API** : Rest API, Manual Testing, SQL, POSTMAN
- **Testing Methodologies** : Agile (Scrum), SDLC, STLC, Usability, Regression, Smoke Testing

PROFESSIONAL EXPERIENCE

Eshopbox Ecommerce Pvt. Ltd.
Quality Assurance Engineer | April 2025–Present

- Performed end-to-end validation for **GCP to AWS migration** of Eshopbox microservices using Postman and SQL, ensuring zero functional regression across Inventory, Orders, Returns, and Platform modules.
- Collaborated with DevOps during migration cutovers by preparing test plans, executing smoke tests, and validating AWS configurations, database consistency, and service availability.
- Designed and executed end-to-end test cases for Order, Product, and Inventory Synchronization across Shopify, Woo-Commerce, Unicommerce, and Eshopbox, validating sync workflows using UI and SQL.
- Developed automation scripts using **Java, Selenium WebDriver,** and TestNG for bulk import and synchronization scenarios, reducing manual effort and improving testing efficiency.
- Executed API testing for Clickpost, Unicommerce, Return Prime, Fynd, and OMS Guru using **Postman**, validating OAuth, shipment creation, AWB generation, tracking, and cancellation APIs.
- Automated sales channel onboarding and integration workflows using Selenium WebDriver and TestNG, validating OAuth, RBAC, user permissions, and workspace configurations.
- Enhanced regression test suites, performed RCA for recurring defects, logged issues in **JIRA**, and collaborated with developers to improve test coverage and release quality.

Pulse EHR software (Life Circles Infomedia Pvt. Ltd.)
QA Engineer | Aug 2022–April 2025

- Executed functional, integration, and regression testing for Pulse EHR modules, including Patient Registration, Appointments, Clinical Workflows, Prescriptions, and Billing.
- Validated RBAC for Doctors, Nurses, Receptionists, and Admin users, ensuring secure access and healthcare compliance.
- Performed REST API testing using Postman to validate patient data operations, integration endpoints, and HTTP responses.
- Executed database testing using SQL to verify backend data accuracy and integrity across application modules.
- Logged, tracked, and retested defects using JIRA, collaborating with developers for timely issue resolution.
- Performed smoke, regression, and integration testing across multiple environments to ensure release quality.
- Participated in Agile ceremonies and defect triage meetings to support successful sprint deliveries.

EDUCATION

DR. D Y Patil Institute of Technology, Pune
Bachelors of Engineerig | 2018 - 2022

KEY ACCOMPLISHMENTS

- **Team Leadership**: Led daily scrum meetings, prioritized production bugs, and provided training to the team, boosting performance by 30%.
- **GCP to AWS Migration**: Delivered complete migration QA on schedule with zero regression and zero production incidents post-deployment — recognized with Kudos Award for on-time delivery.
- **Test Coverage**: Authored 1,000+ end-to-end test cases across e-commerce and EHR domains, substantially strengthening regression confidence and release quality.
- **Kudos Award (x2)**: Recognised for critical Free Signup workflow support and successful on-time GCP-to-AWS migration delivery.
- **Standardization**: Improved defect reporting formats, boosting communication and defect resolution speed by 20%.
