CAREER OBJECTIVE

Experienced Microsoft Dynamics 365 Technical Consultant with over three years of expertise in D365 Finance & Operations (D365 F&O) and Dynamics AX. Proficient in system customization, data migration, and complex integrations across modules. Skilled in Power Platform, SQL, and Azure DevOps for delivering robust and scalable solutions. Always eager to learn and adapt to new technologies to drive continuous improvement and business efficiency.

SUMMARY

- Proficient in X++ programming and MorphX IDE for building and customizing Dynamics 365 applications.
- Built complex customizations involving forms, tables, SSRS reports, data entities, views, and queries following Microsoft best practices.
- Hands-on experience with data migration using DMF, including creation of custom data entities and transformation logic.
- Strong debugging capabilities and adept at enhancing or fixing existing customizations in both D365 and AX 2012.
- Developed and maintained integrations between D365F&O, external systems, and Microsoft applications, supporting business continuity.
- Experience in creating and managing batch jobs to automate key business processes.
- Managed SQL Server tasks including database restoration, backup handling, and scripting of stored procedures and jobs.
- Skilled in Azure DevOps for version control and code branching.
- Automated processes using Power Automate and Logic Apps, reducing manual work and improving accuracy.
- Created high-quality FDDs and TDDs for all technical developments and conducted unit/integration testing.

PROFESSIONAL EXPERIENCE

Synoptek India Pvt Ltd — Ahmedabad, India
Technical Consultant — *Jul 2022 - Present*
D365F&O and AX Intern — *Jan 2022 – Jul 2022*

SKILLS

Technical skills: X++, D365FO Architecture, Data Migration, SSRS, Workflow Customization, Debugging, Documentation (FDD & TDD)
Tools and Technologies: Visual Studio, SQL Server, Azure Logic Apps, Power Automate, Azure DevOps, Lifecycle Services (LCS)
Soft skills: Strong Communication, Requirement Analysis, Client Collaboration, Team Player

PROJECTS

Project: Manufacturer's representative in HVAC and Plumbing industry
Description: An independent sales agent company utilizing AP, AR and Expense management modules.

- Designed and implemented an automated Expense Management process integrating Outlook, SFTP, and D365FO.
- Automated expense report creation by fetching encrypted bank files from an SFTP server, decrypting them using secret keys from Azure Key Vault, and mapping transactions to respective users.
- Acquired hands-on expertise in Power Platform automation, SFTP integration, PGP decryption and SharePoint-ERP connectivity.
- Performed Service Updates in D365FO environments to ensure system stability and access to the latest features.
- **Outcome:** Reduced manual workload in expense reporting by over 80%, enhancing user efficiency and accuracy.

Project: Global manufacturer of industrial machinery
Description: Machine manufacturer using AX 2012 and CE for global customer, work order, and after-sales processes.

- Analysed and reverse-engineered the existing AX 2012 to CE integration to understand the complete architecture of customer-related data flow.
- Designed and developed integration using custom web services from scratch for Work Orders, Time Entries, and Customer Address synchronization between AX 2012 and CE.
- Exported existing AX data via custom X++ jobs and validated integration via custom C# utilities.
- **Outcome:** Improved cross-platform data flow, enabling synchronized operations between CE and AX 2012.

Project: Packaging and Containers Manufacturing Company
Description: A leading provider of transit packaging systems, utilizing the AR and IM module.

- Developed and maintained integrations between D365 Finance & Operations and D365 CE for entities such as Customers, Released Products, and Customer Assets using Power Automate and Virtual Entities.
- Implemented error handling and status tracking for integration reliability.
- Built custom data entities, compared and transformed legacy data to support data migration.
- Worked with ISV solutions like ConfigCompare to identify and reconcile configuration differences between legal entities and environments.
- Scheduled SQL jobs and built stored procedures for automated backend operations.
- **Outcome**: Ensured consistent data across CE and F&O systems, allowing centralized data entry and decentralized execution.

EDUCATION

Adani Institute of Infrastructure Engineering, Gujarat Technological University Jun-2022
Bachelor of Engineering - Information and Communication Technology
CGPA: 9.10

CERTIFICAION

MB-500 : Microsoft Certified: Dynamics 365: Finance and Operations Apps Developer Associate
