ADITYA INGAWALE

Python Full Stack Developer
+91 9699331392 | adityaingawale5002@gmail.com | Pune, India

PROFESSIONAL SUMMARY

Results-driven Python Backend Developer with **2.6 years** of experience **building scalable, secure**, and cloud-native applications using **Python, Django, Django REST Framework**, **FastAPI, AWS, Docker, Kubernetes, PostgreSQL, and Microservices**. Experienced in **REST API** development, **JWT Authentication**, **Swagger/OpenAPI, CI/CD, system design**, **design patterns, database optimization**, and **asynchronous processing using Celery and Redis**. Proven track record of improving API performance**, automating deployments**, and delivering high-quality production solutions in Agile environments.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Backend & APIs: Python, Django, Django REST Framework (DRF), FastAPI, Flask, RESTful APIs, GraphQL, JWT Authentication, OAuth2, Swagger/OpenAPI, Microservices Architecture, Django ORM, Celery, Celery Beat, Redis, Async/Await
Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap, Responsive Design, Next.js
Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL, Database Design, SQL Optimization, Query Performance Tuning, Indexing
Cloud & DevOps: AWS (EC2, S3, RDS, IAM, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, GitLab CI/CD, Linux, Nginx, Gunicorn
Testing & Monitoring: PyTest, Unit Testing, Integration Testing, API Testing, Postman, Logging, Monitoring
Tools & Technologies: Git, GitHub, Jira, Kafka, RabbitMQ, REST Client, JSON, Virtual Environment (venv), Pip, Environment Variables
Software Architecture: MVC Architecture, Design Patterns, Dependency Injection, SOLID Principles, OOP, SDLC
Development Methodologies: Agile/Scrum, CI/CD, Code Review, Debugging, Production Support

PROFESSIONAL EXPERIENCE

Humanus Global Private Limited | Pune, Maharashtra Jan 2025 – Present
Python Full Stack Developer
Key Responsibilities

- Developed scalable web applications using **Python, Django, Django REST Framework (DRF), and FastAPI**.
- Designed and integrated **RESTful APIs** with **JWT Authentication** and role-based access control.
- Optimized **MySQL/PostgreSQL** databases and implemented **Redis** caching for improved performance.
- Developed backend services using **Microservices Architecture** and integrated third-party APIs.
- Performed unit testing using **PyTest**, API testing with **Postman**, and resolved production issues.
- Worked with **Git, Docker, Jenkins, AWS, Linux**, and participated in **Agile Scrum** and **CI/CD** deployments.Worked with Git, Docker, Jenkins, AWS (EC2, S3), Linux, and Agile Scrum methodology for CI/CD deployments.
- Participated in sprint planning, code reviews, and technical discussions to improve application quality.

Humanus Global Private Limited Jan 2024 – Dec 2024
Python Developer Intern

Key Responsibilities

- Assisted in developing backend modules using Python, Django, Django REST Framework (DRF), and Flask.
- Developed CRUD APIs and integrated frontend applications with backend REST services.
- Assisted in database design, SQL query optimization, and bug fixing.
- Implemented user authentication, form validation, and file upload functionality.
- Supported Redis caching, API integration, and debugging activities.
- Performed API testing using Postman and prepared technical documentation.
- Participated in debugging, code reviews, sprint planning, and Agile ceremonies.
- Used Git, Docker, Jenkins, and gained hands-on experience with REST APIs, SDLC, and CI/CD practices.

PROJECTS

Banking Loan Management System

Description:

Developed a web-based Loan Management System to automate customer onboarding, loan application processing, document verification, approval workflows, EMI calculation, payment tracking, and loan status management. The application streamlined banking operations through secure authentication, automated workflows, and real-time loan tracking.

Technologies: Python, Django, Django REST Framework (DRF), PostgreSQL/MySQL, REST APIs, JWT, Git, Docker, Jenkins, HTML, CSS, JavaScript

Responsibilities

- Developed backend modules using Python, Django, and DRF.
- Designed and integrated secure RESTful APIs for customer onboarding, loan management, and EMI calculation.
- Designed database models and optimized SQL queries for better performance.
- Implemented JWT-based authentication and role-based authorization.
- Integrated document upload, verification, and approval workflows.
- Performed unit testing, debugging, API testing using Postman, and deployment support.
- Participated in Agile Scrum ceremonies, code reviews, and production support activities.

Employee Leave & Attendance Management System

Description:

Developed a web-based application for employee leave requests, attendance tracking, and approval workflows, improving HR process automation and operational efficiency.

Technologies: Python, Django, Django REST Framework (DRF), PostgreSQL, REST APIs, Git

Responsibilities:

- Developed backend modules using Python and Django.
- Designed and integrated RESTful APIs for leave and attendance management.
- Implemented JWT-based authentication and role-based access.
- Optimized database queries and improved application performance.
- Performed testing, debugging, and deployment support.
- Collaborated with QA and frontend teams in an Agile environment.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Engineering

Savitribai Phule Pune University, Pune

Graduation: June 2025
