AVINASH GADGE

Full Stack Developer | Python & .NET
+91 7058535417 | avinashgadge21@gmail.com | Pune, India

PROFESSIONAL SUMMARY

Full Stack Developer with Nearly 3 years of experience building scalable web applications and RESTful APIs across the Python and .NET ecosystems. Skilled in ASP.NET Core Web API, Entity Framework Core, and SQL Server on the .NET side, and Python, FastAPI, and Django for backend and AI-driven services. Experienced in Angular front-end development, microservices, containerization with Docker, and cloud deployment on Azure and AWS. Strong grasp of clean architecture, SOLID principles, CI/CD, and Agile delivery, with a proven ability to ship reliable, maintainable, production-ready solutions.

TECHNICAL SKILLS

Languages: C#, Python, SQL, JavaScript, TypeScript

.NET Stack: ASP.NET Core, .NET Web API, Entity Framework Core, LINQ, xUnit, Moq

Python Stack: FastAPI, Django, Django REST Framework, Celery, LangChain

Frontend: Angular, HTML5, CSS3, Bootstrap, React, JSON

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Redis, ChromaDB

APIs & Architecture: REST APIs, Microservices, Repository Pattern, Clean Architecture, SOLID, Swagger/OpenAPI, JWT Authentication

AI / ML: Retrieval-Augmented Generation (RAG), LLM Integration (OpenAI APIs), Vector Embeddings, NLP, Scikit-learn, Prompt Engineering

Cloud & DevOps: Azure (App Service), AWS (EC2), Docker, CI/CD, Azure DevOps, Nginx

Version Control & Tools: Git, GitHub, Jira, Postman, PyCharm, Visual Studio, VS Code

Practices: Agile/Scrum, Code Reviews, Unit Testing, Performance Tuning

WORK EXPERIENCE

Tech Mahindra March 2025 – Present

Python Developer

Insurance Policy Administration & Claims Management System

Tech Stack: *Python, FastAPI, Apache Airflow, Apache Spark,* Django*, PostgreSQL, AWS (*EC2*), Docker, Redis, Git.*

- Developed scalable data ingestion and ETL/ELT pipelines using Python to process structured and semi-structured data from multiple enterprise data sources.
- Built high-performance RESTful APIs using FastAPI for data ingestion, validation, transformation, and analytics services.
- Designed and orchestrated workflow automation using Apache Airflow, enabling reliable scheduling, monitoring, and execution of complex data pipelines.
- Implemented distributed data processing jobs using Apache Spark to transform large datasets and improve processing performance.
- Developed reusable Python modules for data cleansing, validation, enrichment, and schema standardization across multiple data sources.
- Optimized SQL queries, stored procedures, and indexes, improving transaction processing performance and reducing report execution time.

Coremagix Software Pvt. Ltd. July 2023 – Feb 2025

.Net Developer

Enterprise Human Resource Management System (HRMS)

Tech Stack: *C#, ASP.NET Core, Web API, Entity Framework Core, SQL Server, Angular, Azure, Docker, Git*

- Developed scalable RESTful APIs using ASP.NET Core Web API for employee management, attendance, leave tracking, payroll, and performance evaluation modules.
- Designed and implemented relational database schemas in SQL Server using Entity Framework Core with Code-First migrations.
- Built responsive Angular dashboards for HR administrators and employees with role-based access control and JWT authentication.
- Implemented CRUD operations, server-side validation, exception handling, and centralized logging to improve application reliability.
- Optimized SQL queries, stored procedures, and indexing, reducing report generation time by over 40%.

- Integrated email notifications for leave approvals, onboarding workflows, and payroll processing using SMTP services.
- Developed reusable services and repository patterns following SOLID principles and clean architecture.
- Created unit tests using xUnit and Moq to improve application quality and maintainability.
- Containerized applications using Docker and deployed services to Azure App Service.
- Collaborated with cross-functional teams in Agile/Scrum environments using Azure DevOps and Git for source control and CI/CD.
- Participated in code reviews, bug fixing, and performance tuning to ensure production stability.
- Prepared technical documentation and API specifications using Swagger/OpenAPI.

EDUCATION

Bachelor of Computer Science (B.sc) 2020
Pune University
