Professional Summary

Software Engineer with 2+ years of experience in Python, Full-Stack Development, Cloud Infrastructure, and DevOps. Proficient in AWS, Docker, Kubernetes, FastAPI, Node.js, React.js, REST APIs, and CI/CD pipelines. Strong foundation in Data Structures & Algorithms, OOPs, DBMS, Operating Systems, and Linux.

Skills

Programming Languages: Python, C++, JavaScript (ES6+).
Backend Development: Node.js, Express.js, REST APIs, FastAPI, Postman.
Frontend Development: React.js, Tailwind CSS, State Management (Redux, Context API).
Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, Gitlab, Github.
Databases: MongoDB, SQL, PostgreSQL.
GenAI & AI Tools: LangChain, LangGraph, RAG, Prompt Engineering.

Work Experience

KPIT Technologies, Pune, India

Software Engineer Intern → Associate Software Engineer *Jan-2024 - Present*

- Managed and monitored **AWS** production infrastructure for enterprise automotive applications, ensuring high availability and operational stability.
- Developed **Python automation** solutions that reduced manual operational effort by 40%, improved deployment efficiency, and streamlined engineering workflows.
- Designed and developed internal **full-stack applications** using MERN, improving workflow visibility and reducing manual reporting effort.
- Contributed to **DevOps** and **CI/CD** processes using Docker, Kubernetes, Jenkins, and supported **deployment** and monitoring workflows for **cloud-based** production environments.
- Worked on **AI-assisted** tooling and automation solutions to optimize engineering operations.
- Completed extensive training in **Modern C++,** software engineering fundamentals, **DevOps** and development practices during the internship phase.

Persistent Systems,Remote

Summer Intern *June 2023 - October 2023*

- Developed proficiency in **Python** programming language, exploring its applications in various domains.
- Acquired hands-on experience with Linux operating systems, gaining familiarity with command-line interfaces and system administration tasks.
- Enhanced understanding of operating system fundamentals, including processes, memory management, and file systems.

Projects

AI-Powered Document Generation Platform | *Python, FastAPI, ReactJS, Tailwind CSS, LangChain*

- Developed an AI-powered document generation platform using FastAPI and ReactJS for automated document creation, refinement, and workflow automation.
- Integrated LLM-based workflows to generate Design Documents &User Manuals from user inputs and XML files.
- Implemented file processing, markdown rendering, and export capabilities to improve documentation efficiency.

Engineering Reporting Automation System | *Python, FastAPI, Pandas, OpenPyXL*

- Developed an automation platform to generate engineering reports from Jira and Redmine data sources.
- Automated Excel report generation with KPI calculations and data validation, reducing manual effort by 60%.
- Built REST APIs and data-processing pipelines to improve reporting accuracy and efficiency.

Education

Chandigarh Group of Colleges, Mohali,India **2020-2024**

B.TECH *8.5 CGPA*

Achievements

- Awarded Grade **A+** in Programming Language & Technical Knowledge during Genesis Program at KPIT.
- Recognized as **High Flyer** at KPIT Technologies for outstanding performance and contribution.
- Solved 300+ **DSA** problems on LeetCode and GeeksforGeeks.
