GANESH SIDDHESHWAR JADHAV

Full-Stack Developer — React · Redux Toolkit · Node.js · Python

ganeshadream11@gmail.com | +91-7218451646 | Pune, Maharashtra

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with **2+ years of experience** building and maintaining production-grade web applications with **React, Redux Toolkit, Tailwind CSS, JavaScript (ES6+), Node.js, and Python**. Skilled at developing responsive, component-driven user interfaces, managing complex application state with Redux Toolkit, and building and maintaining backend REST APIs. Strong grasp of **database design, query optimization, and indexing** across relational and NoSQL stores. Focused on performance optimization, clean maintainable code, bug fixing, and collaborating with cross-functional teams to ship quality solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Redux Toolkit, Tailwind CSS, Vite, Responsive UI, Component-Driven Design, React Hooks, REST integration

Backend: Node.js, Express, Python, FastAPI, REST APIs, Serverless (AWS Lambda), Microservices, JWT / OAuth 2.0 Auth

Databases: PostgreSQL, MySQL, DynamoDB, MongoDB — schema design, query optimization, indexing, data modeling

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, npm, Webpack/Vite, Agile / Scrum

Cloud (AWS): Lambda, API Gateway, S3, EC2, RDS, DynamoDB, CloudFront, CloudWatch, IAM

Practices: Performance optimization, debugging & bug fixing, code reviews, reusable components, testing

PROFESSIONAL EXPERIENCE

Full-Stack Developer — AI4M Technology Pvt Ltd, Pune — **Jun 2024 – Present**

- Developed responsive, component-driven user interfaces with **React** and **Tailwind CSS**, building reusable components and dashboards that improved page-load performance and user experience
- Managed complex application state using **Redux Toolkit** (slices, RTK Query, async thunks), simplifying data flow and reducing boilerplate across large feature modules
- Built and maintained backend REST APIs with **Node.js** and **Python (FastAPI)**, delivering secure, low-latency endpoints for high-traffic enterprise workloads
- Designed and worked with databases (**PostgreSQL, DynamoDB**) — schema design, complex queries, and **indexing** — cutting API response times by **40%** through query optimization and efficient data modeling
- Optimized application performance and fixed bugs across the stack, improving reliability and reducing defect turnaround on existing features
- Automated build, test, and deployment with **GitHub Actions CI/CD**, enabling zero-downtime releases, and collaborated with cross-functional teams in an **Agile** environment to deliver quality solutions

Full-Stack Developer & Business Analyst — Green Raise Agro Pvt Ltd, Pune — **Dec 2023 – May 2024**

- Built and deployed a cloud-hosted **e-commerce web platform** (**React**, JavaScript, Node.js, AWS) supporting online sales and lead generation with **99.9% uptime**
- Designed relational and NoSQL data models and wrote optimized **SQL queries** on sales and lead data to surface trends and drive data-backed decisions
- Developed **CRM automation** integrating IndiaMART and WhatsApp Business API via Aisensy, **reducing lead response time by 80%** and boosting conversion
- Created responsive reporting dashboards for sales tracking, lead conversion, and customer-engagement analytics
- Led client requirement gathering, product demos, and aligned technical solutions with business goals

KEY PROJECTS

Enterprise Web Platform — India's Leading FMCG Company — **AI4M Technology**

- Built a full-stack application with a **React + Redux Toolkit + Tailwind CSS** front-end and a **Node.js / Python** API back-end
- Implemented secure REST APIs and responsive dashboards for operations, monitoring, and analytics across multiple business units
- Modeled and indexed data in **PostgreSQL and DynamoDB** for scalable, low-latency access, and tuned slow queries to improve throughput
- Optimized application performance and resolved production bugs, improving stability across releases

Spirit Distillation Management Platform — Fortune 500 Spirits & Beverages Client — **AI4M Technology**

- Developed a responsive **React** front-end styled with **Tailwind CSS**, with state managed via **Redux Toolkit**, for monitoring end-to-end distillation operations
- Built **Node.js** and **Python (FastAPI)** back-end services with **PostgreSQL** for batch tracking, process data capture, and production reporting
- Designed the database schema with appropriate indexing and delivered a modular, maintainable architecture that improved process visibility and accelerated reporting

EDUCATION

MCA (Data Science) — MIT College, Pune — 2022 – 2024 | **CGPA: 8.67/10**

B.Sc. Computer Science — Annasaheb Magar College, Pune — 2019 – 2022 | **CGPA: 8.50/10**

CERTIFICATIONS

Full-Stack Web Development (React, Node.js, JavaScript) | **AWS Cloud Technical Essentials** (Coursera)
