Summary

Full Stack Software Engineer with 2+ years of experience delivering web and cross-platform desktop applications using React.js, Next.js, Angular, TypeScript, Electron.js, Node.js, and NestJS. Shipped production-grade solutions across Healthcare, Finance, and HR domains, cutting manual workflows by up to 50%. Hands-on with REST API design, Python scripting, LLM integrations (Gemini, OpenAI), CI/CD pipelines, and Agile delivery. Proven track record of upgrading legacy systems, owning end-to-end feature development, and sustaining high code quality across front-end and back-end stacks.

Education

Sinhgad College of Engineering Pune, Maharashtra
Bachelor of Engineering, Computer Engineering | CGPA: 8.8 *Jun 2020 – Jun 2024*

Experience

Tudip Technologies Jan 2025 – Present
Associate Software Developer

- Build and maintain full-lifecycle web applications using React.js, Next.js, Angular, JavaScript, and TypeScript, spanning server-side rendering, client-side rendering, and static site generation.
- Develop and ship cross-platform desktop solutions using Electron.js and Node.js, ensuring consistent behaviour across Windows, macOS, and Linux while reducing platform-specific defects.
- Author Python-based backend scripts and services for application logic, data processing, and workflow orchestration, coupled with NestJS APIs for structured backend communication.
- Design scalable front-end architecture by building reusable UI component libraries and incorporating REST APIs, reducing duplicate code and accelerating feature delivery.
- Deliver production features across HR, Healthcare, and CRM domains within Agile sprints, consistently meeting release timelines and sprint commitments.
- Received the **Rocking Debut Award** at the company Foundation Day, recognised across a 500+ employee organisation for shipping production features within 90 days – fastest onboarding-to-production in the cohort.

Cravita Technologies Jun 2024 – Dec 2024
Software Development Intern

- Configured and managed AWS infrastructure (EC2, S3, IAM) to support production-grade application deployment across multiple environments.
- Built and sustained CI/CD pipelines using Docker and Kubernetes, cutting deployment time and reducing manual release steps.
- Set up Amazon CloudWatch dashboards and custom alerts for application health monitoring, enabling early issue detection and reducing downtime.
- Deployed and configured an AWS Application Load Balancer to distribute traffic across instances, improving availability and fault tolerance.
- Enforced Auto Scaling policies to adjust compute capacity based on live traffic, lowering infrastructure costs during off-peak periods.

Projects

BoomCloud – Healthcare Dental Practice Management May 2025 – Present

- Engineered a cross-platform desktop application using Electron.js, React.js, Next.js, and Node.js, enabling dental practices to manage day-to-day operations from any supported device and cutting reliance on manual workflows by 40%.
- Incorporated the **Stripe API** to handle bank account onboarding, billing cycle management, and secure payment processing, achieving 99% transaction reliability within the Practice Portal.
- Eliminated paper-based processes by building end-to-end text and email campaign features that systematised 100% of manual practice management workflows.
- Architected the Group Portal's core dashboard and multi-location connection modules to centralise data and communication for practice groups.
- Enforced data validation flows and admin controls in the Admin Portal to maintain data integrity, while sustaining architectural consistency across all three portals for a unified user experience.

ICP Credit – Finance Enterprise CRM & Research Tools Jan 2026 – Present

- Led a major version upgrade from **Angular 15 to Angular 20** across the enterprise application, improving build performance, adopting standalone components, and hardening application security.
- Develop and maintain the full-stack application using **Angular**, **Angular Material**, and **.NET** for backend services, supporting credit research and enterprise CRM workflows.
- Merged **Google Gemini** and **OpenAI** APIs into the Darwin research tool, enabling report generation, section summarisation, and real-time content drafting for editors and analysts.
- Engineered an inline validation interface on the Darwin report editor that lets users review, edit, and approve LLM-generated content before final submission, ensuring 100% data accuracy.
- Developed Python-based OCR tooling and email-to-order processing scripts to eliminate manual data entry, cutting processing time by 50% and lowering data-entry errors.

GreatHr.AI – Internal Procurement Management Tool Feb 2024 – Apr 2024

- Centralised 100% of procurement data by designing a scalable Purchase Order system with item and vendor management modules.
- Applied **Redux Saga** for asynchronous data flows and global state management, improving data consistency and cutting API-related defects by 35%.
- Enabled frontend-driven email notifications for purchase order status updates, accelerating the procurement approval lifecycle by 20%.
- Constructed intuitive UI components that simplified navigation for procurement staff, contributing to a 25% increase in operational efficiency.

Certifications

Databricks Certified Associate Developer for Apache Spark (Data Engineer) 2026
Databricks *Credential ID: 180194325*

Achievements

Rocking Debut Award 2026
Tudip Technologies | Annual Company Foundation Day

- Recognised across a 500+ employee organisation for shipping production features within 90 days – fastest onboarding-to-production in the cohort.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, C#, Java, C, C++

Frontend Frameworks & Libraries: React.js, Next.js, Angular (v15–v20), Angular Material, Electron.js, Material UI, Tailwind CSS, Bootstrap, HTML, CSS

Backend Frameworks: Node.js (Express.js), NestJS, .NET Framework, Django

State Management: Redux Toolkit, Redux Saga, RxJS, TanStack Query, React Hooks, NgRx

LLM & API Integrations: OpenAI API, Google Gemini API, Stripe API, REST APIs

Cloud & DevOps: AWS (EC2, S3, IAM, CloudWatch, ALB, Auto Scaling), Docker, Kubernetes, CI/CD Pipelines

Databases: SQL, MongoDB, PostgreSQL

Testing & Quality: Unit Testing, Component Testing, Code Reviews, Agile/Scrum

Computer Science Fundamentals: Data Structures & Algorithms, DBMS, OOP, System Design

Developer Tools: VS Code, Git, GitHub, Jira, Postman
