EXPERIENCE

Software engineer | *MapZot.AI* March 2025 - Present

- Implemented **Elasticsearch**-based indexing and querying to enable high-speed searching and filtering across large geospatial datasets, reducing query response times by over 60%.
- Engineered a secure integration with the **Meta Graph API** using **OAuth 2.0**, enabling the creation of custom, targeted audiences to enhance the precision of advertising campaigns.
- Developed a polygon generation algorithm leveraging **OpenStreetMap (OSM)** and **Google Maps APIs** to automatically delineate building footprints with over 90% accuracy.
- Developed an automated reverse geocoding system on **AWS** using **Python**, significantly enhancing location data processing speed and overall team productivity.

Full Stack Developer | *Hire Anything* September 2024 - February 2025

- Designed and deployed admin and user websites using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, achieving a 30% reduction in page load times by optimizing React components and implementing lazy loading.
- Enhanced **payment integration** with the Stripe API, securely processing over 1,000 monthly transactions and improving revenue flow by 40%.
- Coordinated system design of a **microservices architecture** with Node.js services and MongoDB, reducing server response time by 20% and improving scalability for 10,000+ monthly users.
- Created detailed **Low Level Design (LLD)** for core modules, defining APIs, database schemas, and service interactions to improve maintainability and development efficiency.

PROJECTS

FOOD APP (Live) (GitHub) REACT.js, REDUX, NODE.js

- Built an online ordering app with React and Redux Toolkit, reducing page reload times by 30%.
- Created custom API routes using Node.js and Express.js, enabling real-time data fetching from Swiggy APIs for 10,000+ restaurants data.
- Enabled restaurant search functionality and sorting by ratings and prices, improving user navigation.

SKILLS

Languages:	C++, JavaScript, Python, Java, SQL
Frontend:	React.js, Redux Toolkit, HTML, CSS, Tailwind CSS
Backend:	Node.js, Express.js, FastAPI
Libraries & Tools:	Pandas, NumPy, Scikit-learn, Git, GitHub, Docker, Postman
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, Problem-Solving, Debugging

EDUCATION

Master of Computer Application — Harcourt Butler Technical University 2022 – 2024

Bachelor of Science — Barkatullah University, Bhopal 2017 – 2020

ACHIEVEMENTS

- Ranked in the top 1% of coders on the Code Studio platform. (Link)
- Solved over **500** data structure and algorithm problems across various coding platforms.
- Achieved a peak contest rating of 1421 in LeetCode Biweekly Contest 122. (LeetCode)
