Genpact India Pvt Ltd (Analytics)(One Promotion from Senior Associate to Business Analyst)

Designation - Business Analyst (Cost/Pricing/Risk Analyst) – A Client Facing Role – Client being GE Aviation

From Sep 2012 to Oct 2014 – Implementation Consultant/Functional Consultant

- Worked on an IT project as lead Functional Consultant of the project where I was responsible for FRDs, Testing, UAT, Documentation of the current processes and to-be processes.
- Preparing Work-Scope modules, deciding which is **In-Scope** and which are **Out-Scope** for Project.
- Preparing the **AS IS** Process and Designing the **TO BE** Process**.**

- Designed the **User Interface** (UI) and worked with IT team in developing the same.
- Working with IT team in ensuring the codes and criteria are captured as per the requirement.
- Tested the entire codes and criteria to ensure that the application is good for Production.
- Prepared the SOP for the TO BE process and conducted UAT for the users to ensure the smooth functioning of the application.
- Worked as single functional point of contact for the issues with application post go-live for which the users are close to 80.
- **Automation, Standardization, Documentation of SOPs etc.** of the as-is Process.Involve into development of cost and pricing scorecard and statistical analysis such as – **target costpreparation, forecasting, trend and gap analysis.**
- Ensuring controls and governance process around the project by liaising with the project manager.
- Suggested/Implemented methods to bring transparency/robustness as a part of project improvement and ensuring better data quality management.
- Compare the **profitability** of various contracts and find out the **various cost drivers** for these contracts.
- Identifying and driving productivity projects to reduce the overall cost of the contracts to make them more profitable.
- **Cost-Minimization Analysis** to compare the cheapest available aviation material and advise the engineering team in GE Aviation to use them.

Designation – Senior Associate
Job Responsibilities from Feb 2011 to Aug 2012-

- Providing the **Advanced Contractual Review** of the Contract once in every quarter to the Aviation head to analyze on how the contract is working and helping them to take decisions on cost reduction and to predict the contract's future.
- Cost Analysis, Variance analysis between the actual cost and the predicted cost and True-Up Analysis of cost and Part Trend Analysis.
- Involved in project with the **MCMS** (Downstream Process) team in getting the required data as per their needs in LCSR (Oracle Data hub) which enables the MCMS process to get the data from LCSR directly rather than waiting from us to give them and extracting the data as per their requirement from MCMS tool.
- Operationally handled a team of 6 people for one year without any customer escalations and many VOC from the stake holders.
- Worked as **SPOC** for Cost front in **Equitable Share Project** which was successful in implementing the project and in-turn helping the business to claim **$22 Million** from the Partner.

- Lean and Six Sigma (GB) Trained and Tested.
- Acquired best performer award from HP for getting down Gladiator Fallouts to zero.
- Acquired best performer award from HP for Q3 2010.

Projects Undertaken (Genpact)

Project Name – Maintenance Cost Management System Automation (Jan 2013 to Aug 2013)

The data preparation for collecting the expenses from the JV partner has been manual and tedious process. This project ensured more simplicity and transparency into data preparation and booking the cost to the JV partner to ensure better audit trail. Suggested ideas for setting up central database to collate all the data in one repository which could be easily available. This project helped in gaining confidence of client which resulted in process being completely owned by me. **This project delivered a direct cost saving impact of $ 27 Million to the client and got many accolades for the same.**

Project Name – GE Aviation CSA Cost Automation (Aug 2013 to Oct 2014)

GE Aviation intends to automate the process of calculation of "True Cost" incurred on a shop visit for engines that are under the CSA contract. This true cost is used for future modelling and for Contract Margin Review. This review enables the determination of future billing rate and rate for revenue recognition that is based on cost incurred on a shop visit. CSA True Cost Analysis is used by the GE Aviation Risk Team for strategic decision making and planning. It serves as a critical input to the future Cost Estimates given by OCEs and ODEs which in turn is used by CAs/DAs/FAs in Financials. Hence it is necessary that True Cost is calculated and reported with utmost accuracy. Since the calculations and changes are done in access and loaded to a database called LCSR, there is no trail of the changes made by a cost analyst to the data and the defects in data quality cannot be measured. **This project aims at providing a system solution to the current cost scrubbing and true cost derivation process.**

Type of Project - ADM (Application Development and Maintenance)

Time Line – 15 Months

Team – Project Manager – Yamini Arora; **Functional Expert –** Sada Shiva Reddy (Offshore), Shilpa Nayak (Onshore); Technical Expert – Nisha Sharma (Onshore), Arjun Malsani (Offshore)

EDUCATION

- Bachelor of Commerce from D.R N.S.A.M FIRST GRADE COLLEGE, Bangalore. 2006- 2009.
- Pre-University GOVERNMENT PRE-UNIVERSITY COLLEGE YELAHANKA, 2004-2006.
- Schooling KENDRIYA VIDYALAYA Bangalore.
