SUMMARY

Full Stack Developer with 2+ years of experience leading end-to-end product development in fast-paced startup environments. Proficient in Python, Next.js, and modern web technologies. Built and deployed AI chatbots, internal automation tools, and a trading exchange system to enhance efficiency and user engagement. Experienced in managing the full SDLC, maintaining scalable systems, and delivering high-quality, user-focused digital products.

EXPERIENCE

Full Stack Developer

Quantace Research **February 2024 - Present,Mumbai**

- Redesigned and modernized the company website using Next.js, improving user engagement by 15% and conversion rates by 10%, while driving a 25% increase in overall web traffic.
- Built and deployed an LLM-powered chatbot that automated 30% of customer support inquiries, reducing response times and improving user satisfaction.
- Developed and launched a multi-channel marketing automation platform (Email + WhatsApp) with Azure OpenAI-based prompt generation, enabling targeted campaigns and improving user retention.
- Engineered scalable backend systems and APIs using Python, FastAPI, and PostgreSQL, handling async workflows, third-party integrations, and high-volume messaging.
- Developed a real estate/TDR exchange platform with custom bidding logic and structured workflows, contributing to product design and system architecture.

Backend Developer Intern

Advertyzment **August 2023- October 2023,Bangalore**

- Developed and integrated backend APIs to optimize data flow, reducing page load times by 15% and improving user satisfaction by 20%.
- Applied machine learning techniques for predictive analytics and reporting, enhancing forecast accuracy by 10%.
- Collaborated with the frontend team to refine UI/UX and improve overall user interaction and visual consistency.
- Optimized data visualization and backend architecture to support faster insights and improved platform scalability.

Projects & Freelance Work

STCE- sovereign trading and clearing engine

- Engineered a high-performance backend engine using Python, FastAPI, and SQLAlchemy, optimizing concurrency and data integrity through advanced transaction control.
- Designed scalable database schemas and matching algorithms, improving system throughput and reducing processing latency.
- Implemented graph-based computation and optimization techniques for efficient data matching and settlement workflows.
- Enhanced platform reliability with atomic operations, caching, and async event handling, ensuring fault-tolerant execution under load.

Onlylectures (Freelance)

- Migrated an existing WordPress-based educational platform to a custom Next.js solution, improving performance and flexibility.
- Implemented authentication, user tracking, and a course shopping system with integrated payments.
- Eliminated WordPress overhead while adding modern features like a responsive UI and real-time updates.
- Technologies used: Next.js, Flask, Stripe API, PostgreSQL

TradeLens - Trading Journal

- Built an intelligent analytics engine using Python and Next.js that calculates win/loss ratios, and visualizes risk metrics through dynamic charts.
- Designed a sleek, responsive UI inspired by fintech dashboards, with dark/light modes, data-rich visualizations using Recharts and Tailwind CSS
- Integrated broker connectivity via APIs (e.g., Fyers, Angel one) to automatically sync trade history, PnL, portfolio performance in real-time.
- Enabled secure cloud storage and authentication with OAuth2 and JWT, ensuring users can securely link multiple brokerage accounts and access data across devices.

EDUCATION

Bachelor of Technology (CSE)

Shri Shankaracharya Technical campus·Bhilai, Chhattisgarh-2023

Senior Secondary (XII)

Vishwadeep Senior Secondary ·Durg , Chhattisgarh-2019

SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Recharts, HTML, CSS
Backend : Python, Node.js, FastAPI, Flask, Django, Express.js, REST APIs , GraphQL
Database & Storage: PostgreSQL, MySQL, SQLite, MongoDB, Prisma, Redis
Cloud: Azure, GCP, AWS, Vercel
Others : Auth.js, JWT, RBAC, GitHub, Docker, Postman
