Mayur Badgujar

Python Full Stack Developer

+91-7083823007 | mayurbadgujar2011@gmail.com | linkedin.com/in/mayurbadgujar | github.com/mayurbadgujar

Profile

Python Full Stack Developer with 3.1+ years of enterprise application development experience, specializing in Django, Django REST Framework, and modern backend architectures. Strong background in RESTful APIs, microservices, JWT authentication, database design, and cloud deployment on AWS and Azure. Experienced in banking, logistics, and healthcare domains with a focus on scalable, secure, and maintainable backend systems.

Skills

Languages: Python 3.x, JavaScript, HTML5, CSS3, SQL, Bash, PowerShell

Frameworks & Libraries: Django, Django REST Framework (DRF), FastAPI, Celery, Django Channels, React.js, Django ORM

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, Database Design, Query Optimization, Indexing

Cloud & Infrastructure: AWS (EC2, S3, RDS, Lambda), Azure, Docker, Kubernetes, Terraform

CI/CD & DevOps: Jenkins, GitHub Actions, CI/CD, Git

Server & Deployment: Gunicorn, uWSGI, Nginx, Linux, python-dotenv, Environment Configuration

Testing & Tools: Pytest, unittest, Postman, Swagger/OpenAPI, API Testing, VS Code

Architecture & Methodologies: REST APIs, Microservices, WebSocket, Event-Driven Architecture, Distributed Systems, Clean Architecture, SOLID Principles, Agile/Scrum, JSON

Experience

Ventas Softech (Collabera) Bengaluru, India

Software Developer – Python Full Stack *June 2023 – Present*

- Designed and delivered enterprise-grade applications across banking and logistics domains using Django REST Framework and React.js, ensuring scalable and production-ready solutions.
- Built and maintained DRF APIs for transaction workflows, inventory management, async task queues with Celery + Redis, and notification services following Clean Architecture and SOLID principles.
- Optimized PostgreSQL and MySQL schemas using Django ORM, raw SQL, stored procedures, and indexing strategies, reducing query latency by reducing query latency by 35%.
- Developed reusable React.js components and responsive UI modules for admin dashboards, operational monitoring, and management systems.
- Implemented JWT-based authentication, OAuth2, role-based access control (RBAC), and centralized middleware for secure API authorization workflows.
- Resolved 40+ production issues and led deployment activities on AWS (EC2, S3, RDS), maintaining 99.9% application uptime and operational stability.
- Collaborated within Agile/Scrum teams for feature development, code reviews, testing, and production support with full Swagger/OpenAPI documentation.

Projects

Clean2U | *Python, Django REST Framework, AWS, PostgreSQL, Docker, Gunicorn, Nginx*

- Developed and maintained RESTful APIs for a cloud-based Cleaning Service management system using Django REST Framework, serving multiple client environments.
- Implemented exception handling, input validation, and custom Django middleware, reducing runtime errors by approximately 30% and improving system reliability.
- Deployed and managed services on AWS (EC2, S3, RDS) with Gunicorn + Nginx for production serving and server health monitoring.
- Wrote Pytest-based unit and integration tests, achieving 80%+ code coverage on critical API endpoints.

DevOps Automation for Microservices Deployment

Python, Azure DevOps, Docker, Kubernetes, Terraform, YAML, CI/CD

- Designed and implemented end-to-end CI/CD pipelines in Azure DevOps for Python-based containerized microservices, enabling automated build, test, and release workflows.
- Created modular YAML pipelines supporting microservices deployments with reusable templates and stage-based execution across multiple environments.
- Automated Azure infrastructure provisioning using Terraform for VMs, networking, and storage, reducing manual setup time and ensuring consistent environment configuration.
- Integrated approval workflows and environment-specific configurations for secure, controlled releases across development, staging, and production environments.

GetPlan – Business Service Platform | *Python, Django, React.js, HTML5, CSS3, PostgreSQL, Nginx*

- Developed and maintained full-stack web modules for a business service platform using Django and DRF, delivering 15+ API endpoints across frontend and backend.
- Built responsive UI pages using React.js, HTML5, and CSS3, ensuring consistent user experience across the platform.
- Integrated frontend components with backend DRF endpoints for dynamic data rendering and form submissions.
- Managed PostgreSQL database operations including schema design, Django ORM migrations, and query optimization workflows.

Education

R.C. Patel Institute Of Management Research And Development — Shirpur, India

Integrated MCA (BCA + MCA) | CGPA: 8.8 — *2019 – 2024*

Certifications

Python Full Stack | *Qspiders*

AWS Cloud Quest: Cloud Practitioner | *Udemy*

Machine Learning with Python | *LinkedIn Learning*

SQL Database Programming | *Udemy*

Google Cloud Fundamentals | *Udemy*
