Nikhil Bhoi

Software Engineer

nikhilbhoi20012@gmail.com +91 7559209106 https://www.linkedin.com/in/mail-to-nikhil-bhoi-409918213/

Software Engineer with 2+ years of experience in building scalable web applications using Python, Django, and React.js. Skilled in REST API development, backend integrations, and full-stack application development. Experienced in AI chatbot development using Ollama, Flask, and LLM integrations. Familiar with Prompt Engineering, RAG workflows, API-based AI systems, and local LLM deployment. Strong understanding of MySQL, PostgreSQL, Git/GitHub collaboration, and clean software architecture.

Experience

Software Engineer (Remote) Feb 2024 - Present
Web Minds IT Solutions, Pune

- Developed and maintained scalable backend applications using Python.
- Designed and implemented RESTful APIs for web-based systems.
- Built secure authentication and authorization mechanisms using JWT.
- Designed and optimized relational database schemas (MySQL/PostgreSQL).
- Implemented CRUD functionality with input validation and structured error handling.
- Improved API performance by optimizing SQL queries and indexing strategies.
- Collaborated with frontend developers for seamless API integration.
- Troubleshot and resolved production issues to ensure system reliability
- Integrated AI chatbot functionalities using OpenAI/Gemini APIs.
- Worked on API-based automation workflows and intelligent response systems.
- Collaborated using Git/GitHub with structured version control practices.

Projects

Advanced Event-Driven Audit & Compliance System

- Developed a real-time audit lifecycle management system covering audits, incidents, timelines, and compliance tracking.
- Implemented event-driven workflows to record and process audit events efficiently.
- Built secure REST APIs using Django REST Framework and integrated JWT authentication.

AI Chatbot System using Ollama & Flask

- Developed an AI-powered chatbot application using Python, Flask, and Ollama local LLM integration.
- Built REST API endpoints for real-time AI conversations and intelligent response handling.
- Implemented frontend-backend communication using JavaScript Fetch API.
- Designed both Web-Based and CLI-Based chatbot interfaces for interactive AI conversations.
- Worked with local LLM models (phi3:mini) for offline AI inference and prompt execution.

Technical Skills

- **Backend:** Python, Django, Django REST Framework, REST APIs, JWT Authentication, Event-Driven Architecture
- **Frontend:** React.js, Vite, JavaScript, HTML5, CSS3
- **Databases:** SQLite, MySQL, PostgreSQL, Vector Databases (Basic)
- **AI / Machine Learning:** OpenAI API, Gemini API, AI Chatbot Development,RAG (Retrieval-Augmented Generation),Prompt Engineering, AI Agents,Python for ML, Data Preprocessing, Basic Model Training
- **Tools:** Git, Postman, VS Code

AI / LLM Skills

- **LLM Integration:** Ollama, OpenAI API, Gemini API
- **AI Development:** AI Chatbots, Prompt Engineering, RAG Workflows,Context Handling, Local LLM Deployment
- **Backend AI Systems:** REST APIs, AI Workflow Automation,API-Based AI Systems, File-Based AI Systems
- **Tools & Platforms:** Git, GitHub, Flask, Postman, VS Code

Education

High School 2018

Godavari Foundations, Jalgaon 2022

- Bachelor of Technology
- CGPA: 7.4
