OMKAR KIRAN DESHPANDE

Python Developer | Django | Flask | FastAPI | REST APIs | React.js | MySQL | AWS | Docker
+91 9975489869 | omkardeshpande514@gmail.com |Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Python Developer with **3+ years of experience** in developing scalable web applications, backend services, REST APIs, and database-driven solutions. Strong expertise in **Python, Django, Flask, FastAPI, React.js, MySQL, PostgreSQL, AWS, Docker, Git, and API Integration**. Experienced in application development, database design, deployment, debugging, testing, and production support. Skilled in Agile development environments with a strong understanding of software engineering principles and modern development practices.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- **Backend:** Python, Django, Flask, FastAPI, RESTful APIs
- **Database:** MySQL, PostgreSQL, SQLite, SQL, Query Optimization
- **Cloud & DevOps:** AWS (EC2, S3, IAM), Docker, Git, GitHub
- **API Tools:** Postman, Swagger/OpenAPI, API Integration
- **Security:** JWT Authentication, Role-Based Access Control (RBAC)
- **ORM Framework:** Django ORM, SQLAlchemy
- **Tools & IDE:** VS Code, PyCharm, Jupyter Notebook
- **Concepts:** OOP, Data Structures, Exception Handling, Debugging, Design Patterns
- **Methodologies:** Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

JDIT Software Solutions Pvt. Ltd. | Jul 2024 – Present
Python Developer
Key Responsibilities

- Developed and maintained **REST APIs** using **Python, Django, Flask, and FastAPI**
- Designed and optimized **MySQL/PostgreSQL databases** for business applications
- Developed responsive and reusable UI components using **React.js**, **HTML, CSS, and JavaScript**
- Integrated **third-party APIs** and external services for seamless data exchange
- Performed **application debugging, testing, deployment, and production support**

TeamLease Services | | Jul 2023 – Nov 2023
Python Developer
Key Responsibilities

- Provided **application support** and **troubleshooting services**
- Resolved **user-reported** issues and technical queries
- Monitored application performance and operational activities
- Prepared **reports** and **maintained** project documentation
- Assisted in system configuration and **support operations**

Nimbja Security Solutions Pvt. Ltd. | | Jun 2022 – Jun 2023
Junior Python Developer
Key Responsibilities

- Developed web application modules using **Python and Django**
- Created and consumed **REST APIs** for application integration
- Worked on **MySQL database design and query optimization**
- Fixed bugs and enhanced **application performance**

PROJECT EXPERIENCE

1. Employee Management System

Project Description

Developed an enterprise Employee Management System designed for **employee onboarding, attendance tracking, leave management, payroll processing, department management, and workforce reporting**. Built scalable backend services and secure APIs to streamline HR operations and improve workforce productivity. Collaborated with stakeholders to deliver reliable and user-friendly business solutions.

Responsibilities

- Developed **REST APIs** using **Python, Django, and FastAPI**
- Implemented **employee, attendance, payroll, and leave management modules**
- Designed and optimized **MySQL database structures and queries**
- Integrated frontend applications with **backend services**

---

2. Healthcare Appointment Management System

Project Description

Developed a healthcare platform supporting **patient registration, appointment scheduling, doctor management, consultation tracking, and notification services**. Built secure backend services and APIs to improve healthcare workflow management and patient experience. Ensured application performance, security, and scalability for day-to-day healthcare operations.

Responsibilities

- Developed backend services using **Python, Flask, and REST APIs**
- Implemented **authentication and authorization** functionalities
- Managed patient, doctor, and appointment workflows
- Created API documentation using **Swagger/OpenAPI**

---

3. E-Commerce Order Management Platform

Project Description

Developed a large-scale E-Commerce platform supporting **product catalog management, order processing, inventory tracking, payment integration, customer management, and reporting operations**. Built scalable APIs and backend services to support business transactions and improve operational efficiency.

Responsibilities

- Developed **REST APIs** using **Python and Django**
- Implemented **product, inventory,** and order management modules
- Integrated **third-party payment** and notification services
- Optimized database performance and **API response times**

ADDITIONAL CERTIFICATION

Full Stack Development in Python

NxtWave CCBP | Hyderabad

EDUCATION

Bachelor of Arts (B.A.)

Yashwantrao Chavan Maharashtra Open University
