PRASAD NIKAM

Full Stack Developer | AI Applications | React.js & Python

nikamprashu03@gmail.com | +91 9604451908 | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI-focused Full Stack Developer with experience building scalable web applications, intelligent automation solutions, and AI-powered platforms using React.js, Python, FastAPI, LangChain, LangGraph, and OpenAI APIs. Experienced in designing responsive user interfaces, integrating REST APIs, implementing AI-driven workflows, and developing production-ready applications. Skilled in frontend architecture, chatbot development, vector databases, Retrieval-Augmented Generation (RAG), and agent-based systems. Passionate about leveraging AI technologies to solve real-world business challenges while delivering intuitive user experiences and high-performance applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js JavaScript, HTML5, CSS3, Material UI, Redux, Authentication, API Integration

Backend: Python, FastAPI, Node.js, REST APIs, CICD

AI / ML: LangChain, LangGraph, OpenAI API, Prompt Engineering, Chatbot Development, Embeddings, RAG, AI Agents,

Tools & DevOps: Git, GitHub, VS Code, XAMPP, Postman, Docker, PowerBi,

Databases: MySQL, SQL , PostgreSql, Pinecone (Vector Database)

Cloud & Others: L AWS (Learning) , Linux, Payment Gateway Integration

Soft Skills: Problem Solving • Agile Collaboration • Communication • Ownership • Fast Learner

WORK EXPERIENCE

Software Developer (AI) — Combat Solution

May 2025 – Present • Nashik, India

• Developed AI-powered web applications using React.js, Material UI, and REST APIs, delivering responsive and scalable user interfaces.
• Built reusable components, dashboards, forms, and data visualization modules to improve development efficiency and user experience.
• Integrated backend APIs for AI-driven features including chatbot interfaces, workflow automation, analytics dashboards.
• Collaborated with AI, backend, and product teams in Agile environments to deliver production-ready solutions.

Software Developer | MiraiYug

Aug 2024 – April 2025 • Nashik , India

• Developed and maintained responsive, user-friendly web applications using React.js, JavaScript, HTML5, CSS3, MUI.
• Designed and implemented interactive web pages, reusable UI components, and dynamic forms to deliver seamless user
• Integrated REST APIs and managed frontend-backend communication for real-time data processing and user interactions.
• Participated in debugging, testing, code reviews, and feature enhancements while following Agile development practices and Git-based version control.

Customer Support Analyst | Concentrix Pvt Ltd

Jan 2024 – Aug 2024 • Bangalore, India

• Analysed recurring customer concerns and collaborated with internal teams to improve support processes
• Developed strong communication, problem-solving, and stakeholder management skills through daily customer interactions.

Trainee Software Developer | Edigi Digital Hub Pvt Ltd

July 2023 – Dec 2023 • Nashik, India

• Developed responsive web application interfaces using HTML5, CSS3, JavaScript, and React.js.
• Assisted in integrating REST APIs and implementing frontend features based on business requirements.
• Used Git for version control and worked in an Agile development environment to deliver features on schedule
• Implemented authentication modules, dynamic forms, and client-specific business features.
• Participated in debugging, testing, and code reviews to improve application quality and performance.

PROJECTS

ALTIV – AI-Powered Resume Analysis Platform *[React.js, Material UI, Python, Flask, AI/ML, Razorpay API]*

ALTIV is an AI-powered career intelligence platform designed to help job seekers evaluate and improve their resumes through data-driven insights. My primary responsibility was designing and developing the frontend application using React.js and Material UI while integrating backend APIs for resume analysis, FOBO scoring, role recommendations, and skill-gap assessments. I developed responsive dashboards, resume upload workflows, authentication screens, and payment modules while ensuring seamless communication between frontend components and AI-powered backend services. The platform enabled users to gain personalized career insights and automate significant portions of the job application process.

Multi-Agent AI Research System *[Python, Streamlit, OpenAI API, BeautifulSoup, Requests]*

Built a multi-agent AI research system where specialized agents performed web search, content extraction, report writing, and critique to generate structured research outputs. Designed a modular workflow with Search, Reader, Writer, and Critic agents, improving task decomposition and output quality over single-prompt approaches. Integrated web scraping and tool-based LLM orchestration to collect context from online sources and synthesize it into polished research-style reports. Developed an interactive Streamlit UI to allow users to input topics and trigger the complete end-to-end research pipeline.

Bot Builder – Custom AI Chatbot & Agent Creator *[React.js, Material UI, Python, Flask, LangChain]*

Bot Builder is a no-code platform that enables users to create, configure, and deploy AI-powered chatbots without programming knowledge. I was responsible for developing the frontend interface, building reusable React components, and integrating APIs that powered chatbot creation, deployment, and monitoring. The platform included dynamic configuration panels, workflow management screens, and conversation monitoring dashboards. I collaborated closely with backend and AI teams working on LangChain and LangGraph integrations to ensure smooth communication between the user interface and agent-based AI workflows, making chatbot creation accessible to non-technical users.

ChatGPT Clone – Conversational AI Web App *[Streamlit, OpenAI API, Python Mistral Api, LangChain, JavaScript]*

Developed a ChatGPT-inspired conversational AI application that provides real-time AI-generated responses through an interactive chat interface. Integrated OpenAI and Mistral APIs with LangChain to support contextual conversations and prompt orchestration. Implemented conversation history, session management, and response streaming while gaining hands-on experience with LLM integration and conversational AI development.

EDUCATION

Bachelor of Engineering (B.E.) • Savitribai Phule Pune University

Jul 2020 – Jul 2023 CGPA: 8.3

Diploma in Engineering • Government Polytechnic, Nashik

Jul 2017 – Jul 2020 Percentage: 77%

CERTIFICATIONS

- Google Cloud Arcade Program (Certified Facilitator, 180-day program).
- Gen AI Study Jam Cohort 2024 by GDSC, Marwadi University, Rajkot.
- Cisco Python Data Analytics Essentials Certification
- IBM Python 101 for Data Science — Cognitive Class (Verified Badge).
