SUMMARY

Full-Stack Developer with 3 years of experience building scalable, end-to-end web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in reusable UI architecture, Redux state management, and RESTful API design. Experienced in CI/CD and Agile/Scrum workflows. Built AI-powered features including RAG pipelines and LLM integration. AWS Certified Cloud Practitioner.

SKILLS

Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Redux, HTML5, CSS3, Bootstrap, Responsive Design, Performance Optimization
Backend: Node.js, Express.js, Djaongo, REST APIs, JWT Authentication, MVC Architecture
Database: MongoDB, Mongoose, MySQL
AI & LLM: RAG Pipeline, Prompt Engineering, Intent Detection, LLM Integration, Groq SDK (Llama 3.3 70B), OpenRouter API
Cloud & DevOps: Vercel, AWS (Cloud Practitioner), CI/CD, Docker
Testing: Jest, React Testing Library
Tools: Git, GitHub, Postman, Agile/Scrum, SDLC, Code Reviews, AI coding assistants

PROFESSIONAL EXPERIENCE

Wipro - Project Engineer — Jan 2023 - Present

- Developed scalable and responsive React.js user interfaces, improving page load performance by ~25% and ensuring seamless experience across devices.
- Built a Timesheet Tracker using React Hook Form managing 10+ fields with validations, dropdowns, and real-time updates; implemented copy-paste functionality reducing repetitive data entry by 50%.
- Developed reusable UI components and custom hooks, reducing code duplication by ~30% and improving development efficiency across multiple modules.
- Integrated 10+ REST APIs using Axios with optimized error handling, loading states, and caching strategies, improving data fetching efficiency and user experience.
- Optimized application performance using React.memo, useMemo, lazy loading, and code-splitting, reducing unnecessary re-renders and bundle size by ~30%.
- Participated in Agile/Scrum ceremonies, code reviews, debugging, testing, and production issue resolution while following software engineering best practices and SDLC processes .

PROJECTS

PR Review | Live | GitHub — Mar 2026

- Built a full-stack AI developer tool integrating GitHub REST API to fetch PR diffs and Groq SDK (Llama 3.3 70B) to generate structured code review feedback on code quality, bugs, and best practices.
- Developed React + Vite frontend with React Router and Axios, and engineered Node.js/Express REST APIs using MVC architecture with MongoDB for scalable data persistence.

Nexus CRM | Live | GitHub — Jan 2026

- Developed a full-stack CRM platform using React.js, Node.js, Express.js, and MongoDB to manage the complete lead lifecycle, including lead creation, updates, activity tracking, and team collaboration. Designed RESTful APIs with JWT-based authentication and authorization, and implemented advanced filtering, search, and categorization to efficiently handle large datasets.
- Built interactive dashboards and reusable UI components to visualize pipeline stages and lead activity. Architected scalable MongoDB schemas and implemented activity logs with a commenting system to optimize performance and enable seamless cross-team collaboration.

KicksCulture | Live | GitHub — Dec 2025

- Built a full-stack e-commerce application supporting 50+ products with RESTful APIs for cart, wishlist, orders, addresses, and order history, including dynamic pricing and real-time data handling.
- Developed an AI chatbot using a RAG pipeline with intent classification and dynamic MongoDB queries, and engineered a robust LLM integration (Llama 3.3 70B) with structured JSON responses and fallback mechanisms for reliable output.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) - Amazon Web Service, 2023

EDUCATION

Dr. Dy. Patil Institute of Technology — **Pimpri, Pune**
Bachelor of Engineering, Mechanical - 8.8 CGPA — **2018-2022**
