PROFESSIONAL SUMMARY

Associate Manager with 12 years of experience in Microsoft Dynamics 365 Finance & Operations (D365 F&O), AX 2012, AX 2009, and SAP S/4HANA. Specialized in solution architecture, performance optimization, large-scale data migration, integrations, and upgrade-safe customizations. Proven ability to lead global cross-border teams and deliver scalable ERP implementations aligned with business objectives. Currently enabling Microsoft Copilot and AI-driven capabilities MCP in Dynamics 365 Finance & Operations, including configuration, environment setup, and governance alignment. Providing training sessions on AI integration, Copilot extensibility, and functional–technical adoption across global teams.

LEADERSHIP & MANAGEMENT HIGHLISHTS

- Driving adoption of Microsoft Copilot agent MCP and AI capabilities within D365 F&O by conducting enablement workshops for functional and technical teams.
- Led and mentored a 20+ member cross-border technical team for the Global Carrier Program (GCP) Japan.
- Collaborated closely with Product Owners and business stakeholders to refine requirements, prioritize backlog items, and provide roadmap input.
- Managed technical implementation plans, release scopes, and delivery governance for multi-country ERP rollouts.
- Coordinated cross-functional teams (development, QA, security, infra) during go-live and stabilization.
- Guided teams consultants in best practices for ERP development, testing, and deployment.
- Served as primary technical liaison for clients in Japan, Germany, Belgium, Australia, and the U.S.
