SOUMYA SHARMA

Ghaziabad, Uttar Pradesh, India
+91 8595305139 soumyasharma2608@gmail.com

Summary

- Results-oriented Backend Developer specializing in Python, automated workflows, and AI integration. Highly proficient in Django, Django Rest Framework, and managing complex databases (PostgreSQL, Redis). Adept at building data pipelines using Power Automate and engineering LLM solutions via LangChain (Gemini, OpenAI) to optimize business logic and parse data from diverse ERP environments.

Technical Skills

Languages: Python (Expert), SQL, JavaScript
Frameworks & Libraries: Django, Django Rest Framework (DRF), LangChain, Pandas, NumPy, Scikit-Learn
Databases & Tools: PostgreSQL, Redis, Firebase, Microsoft Power Automate, Git, REST APIs, ORM
AI Technologies: Gemini, OpenAI API, LLM Integration, Prompt Engineering, RAG Architectures

Experience

Data Resolve Technologies **Present**
Software Developer (Backend & AI Integration) *Ghaziabad, India*

- Designed and implemented robust, scalable backend REST APIs using Python, Django, and DRF for Data Loss Prevention (DLP) security suites.
- Integrated Gemini and OpenAI APIs via LangChain to automate the summarization of complex security alerts, significantly accelerating data triage workflows.
- Utilized Redis for API caching and data stream management, optimizing backend query response times for relational PostgreSQL databases.
- Leveraged Microsoft Power Automate to orchestrate scheduled data extractions, transferring logs from legacy ERP environments into modern analytical data pipelines.

WESEE, Ministry of Defense **1 Year**
Software Developer (Backend Systems) *New Delhi, India*

- Engineered secure internal backend services utilizing high-level Python on Linux to safely handle concurrent, high-velocity data streams.
- Designed and maintained relational database schemas, ensuring data integrity and optimizing SQL queries for fast retrieval and processing.
- Applied core data structures and algorithms to parse, filter, and structure large datasets before exposing them via internal APIs.

Key Projects

AI-Powered Internal Knowledge Base — *Python, Django, LangChain, Gemini, OpenAI, PostgreSQL*

- Built an end-to-end Retrieval-Augmented Generation (RAG) system utilizing LangChain to parse and query unstructured documentation from enterprise file storage.
- Configured vector stores and optimized prompt engineering to enable context-aware capabilities with cross-model flexibility between OpenAI and Google Gemini.

Enterprise Data Automation & Prediction Suite — *Python, Power Automate, Pandas, PostgreSQL*

- Created automated data sync workflows using Power Automate to aggregate structured JSON and CSV reports exported from fragmented legacy database silos.
- Built a data processing pipeline using Pandas to clean and format ERP resource trends, feeding the data directly into PostgreSQL via Django ORM.

Education

Dr. A.P.J Abdul Kalam Technical University **2018 – 2022**
Bachelor of Technology in Computer Science Engineering (72%) *India*
