TEJAS TEKADE

Python Full Stack Developer
+91-8329365172 | tejastekade1111@gmail.com | Pune, India

PROFESSIONAL SUMMARY

Python Full Stack Developer with 2+ years of experience in designing, developing, and deploying scalable web applications and data-driven solutions. Proficient in backend development using Python, FastAPI, Flask, and Django, along with frontend technologies such as HTML, CSS, JavaScript, and React.js. Strong expertise in building RESTful APIs, ETL pipelines, and database management using MySQL and PostgreSQL. Experienced in data analysis, visualization (Power BI, Tableau), and optimizing system performance. Immediate joiner with strong problem-solving skills and a passion for building efficient, high-quality applications.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Frontend Technologies:** HTML, CSS, JavaScript, React.js
- **Backend Frameworks:** FastAPI, Flask, Django, Django REST Framework (DRF)
- **Databases:** MySQL, PostgreSQL, SQL Server, MongoDB
- **API Development:** RESTful APIs, API Integration
- **Data Engineering:** ETL Pipelines, Data Cleaning, Data Transformation
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Tools:** Pandas, NumPy, Matplotlib, Seaborn
- **Version Control & Tools:** Git, JIRA, Postman
- **Other Skills:** Microservices Architecture, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Python Full Stack Developer
SDK Infotech | March 2024 – Present

- Developed and maintained full stack web applications using Python (FastAPI, Flask, Django) and React.js
- Designed and implemented RESTful APIs for seamless frontend-backend integration
- Built dynamic and responsive user interfaces using HTML, CSS, JavaScript, and React.js
- Developed scalable ETL pipelines using Python (Pandas) and SQL for data processing
- Integrated backend services with Power BI and Tableau dashboards for real-time insights
- Optimized database queries and improved application performance
- Implemented authentication, validation, and error handling mechanisms
- Collaborated with cross-functional teams in Agile/Scrum environment

PROJECTS EXPERIENCE

Project Name: Sales Insights – Retail Analytics Platform

Description:

Developed a full stack retail analytics platform to analyze multi-store sales data, enabling real-time reporting, KPI tracking, and demand forecasting.

Key Responsibilities:

- Built backend APIs using FastAPI and Flask for data processing
- Developed interactive frontend dashboards using React.js
- Designed ETL pipelines for data ingestion and transformation
- Performed data analysis and forecasting for business insights
- Integrated Power BI dashboards for visualization
- Optimized SQL queries for faster data retrieval

Project Name: DataFornix Management System

Description:

Developed a centralized full stack management system for handling business operations, data storage, and reporting with real-time analytics dashboards.

Key Responsibilities:

- Designed backend architecture using Django and REST APIs
- Developed frontend UI using React.js for better user experience
- Managed database operations using PostgreSQL
- Implemented authentication and role-based access control
- Automated reporting and data processing workflows
- Ensured application scalability, performance, and security

EDUCATION

Bachelor of Computer Applications (BCA)

Kavayitri Bahinabai Chaudhari North Maharashtra University (KBC NMU), Jalgaon

---

KEY ACHIEVEMENTS

- Reduced manual reporting effort by **40% through automation**
- Improved query performance by **30% through SQL optimization**
- Successfully delivered scalable full stack applications with real-time analytics
