Vipul Sanga

Full Stack Developer | Backend Developer | Python | Software Engineer | 2 YOE

vipulsanga53@gmail.com · +91-9860903839 · Solapur, Maharashtra · LinkedIn · Portfolio

Professional Summary

Python Full Stack Developer with **2+ years of experience** building robust web applications using **Django**, **REST APIs**, **PostgreSQL**, and **React.js**. Skilled in developing enterprise-grade dashboards, AI-powered chatbot solutions, and high-performance backend architectures with a strong focus on scalability, maintainability, and user experience.

Technical Skills

Languages & Frameworks: Python, Django, DRF, JavaScript (ES6+), React.js, HTML5, CSS3, Bootstrap

Databases: PostgreSQL, MySQL, SQLite, MongoDB, DynamoDB

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, API Gateway, RDS, CloudWatch), Docker, CI/CD, Git, GitHub Actions

AI / ML: LLMs, RAG, LangChain, Vector Databases, Prompt Engineering, AI Agents

Web & Tools: RESTful APIs, AJAX, Fetch API, ag-Grid, Highcharts, Postman, VS Code, Linux

Work Experience

Member of Technical Staff | **Earth Solution Pvt. Ltd.**, Pune *Aug 2024 – Present*

- Engineered scalable full stack web applications using **Django, DRF, PostgreSQL, React.js,** and **Bootstrap** for enterprise clients with high-volume data requirements.
- Designed and delivered **30+ production-grade REST APIs**, optimizing serializers and query logic to reduce frontend data-fetch latency.
- Built data-intensive **financial analytics dashboards** using **ag-Grid** and **Highcharts** for real-time large-scale business data visualization.
- Enhanced **AI chatbot capabilities** by introducing conversation history management, intelligent search, and **real-time response streaming**.
- Designed REST APIs that convert unstructured responses into reusable structured data with download/export options, improving response usability and processing time by **40%**.
- Designed and maintained scalable **backend services**, database models, and business logic using **Django** and **PostgreSQL**

Python Full Stack Developer Intern | **Anudip Foundation** *Jan 2024 – Jul 2024*

- Developed web application modules using **Django, PostgreSQL, HTML5, CSS3,** and **JavaScript**, contributing to a production-ready codebase.
- Built **RESTful APIs** for frontend-backend communication and implemented asynchronous data fetching with **Fetch API** and **AJAX**.

Projects

Service Provider Booking Platform *Django, DRF, PostgreSQL, React.js*

- Built a full-stack service booking platform with **Django REST Framework** and **React.js**, featuring responsive dashboards, provider listings, booking workflows, and **role-based access control (RBAC)**.
- Implemented secure REST APIs and optimized **PostgreSQL** queries for data integrity and performance at scale.

Employee Performance & Task Analytics System *Django, DRF, PostgreSQL, React.js*

- Developed a task tracking and performance analytics platform with **REST APIs**, role-based dashboards, and **Highcharts** KPI visualizations (task completion, productivity scoring).
- Designed optimized **PostgreSQL** models for real-time aggregation and reporting on employee metrics.

Education

A.G. Patil Institute of Technology, Solapur | *B.Tech in Computer Engineering* **CGPA: 8.60** *2020 – 2023*

Solapur Education Society's Polytechnic | *Diploma in Computer Technology* **80.40%** *2017 – 2020*
